Based on recent studies, information security is the #1 IT issue facing higher education institutions. Join EdScoop and industry experts to learn how cloud-based strategies can protect student privacy and meet compliance.

September 8, 2016 // 1 to 2 PM EST

Higher-education institutions need efficient and secure network infrastructures that can manage user volume, speed and big data storage. Learn how the cloud can be used to automate and simplify the on and off ramp to cloud-based and mobile applications to effectively support digital learning and prevent loss of student data.

Webinar Highlights:

- Attract, engage, and retain students by providing secure access to next-generation digital learning
- Protect data and privacy by securing the network
- Reduce costs with simplified infrastructure deployment, management, and operations while accelerating and automating services
