Subject: SCCATTS Planning Meeting

I wanted to follow-up on my email earlier today about the SCCATTS planning meeting this Thursday.

The goal of this first meeting, and others to come, will be to develop a plan for the "perfect" SCCATTS system. Basically, we should layout a plan for a finished product that will meet the needs of all Stakeholders.

Mr. Schweitzer suggested starting with a very small group and adding people as we needed. Starting with the three of us, I believe that we can decide how to approach the planning, who else will need to be involved, and when they should be involved. It was stressed to me that we should not concern ourselves with current legislation or "territorial" issues. Our focus should be on efficiency, cost effectiveness, and stakeholder needs.

I believe the best approach will be to start with a list of stakeholder needs and then walk through the collision and citation data flow process step by step. However, I am open for other ideas or suggestions.

Also, I wanted to send some historical information on SCCATTS. The Gartner Group did a study for DPS on SCCATTS in 2000-2001. I have attached the results of their study. A lot has changed since the study was completed, but it should help give some insight on the original purpose of SCCATTS.

If you have any questions or suggestions before Thursday afternoon please let me know. I will be out of the office tomorrow, but I will be checking my messages throughout the day.

Thank you,

Jake
