Here you go Vera, let me know if you have any questions.

Quote from Haley press secretary Chaney Adams, "Governor Haley believes offshore exploration should be done in a way that protects, and never compromises, our environment, our ports or our tourism industry. But as she has worked with members of the congressional delegation and the General Assembly on this critical economic development issue, she's also been clear: exploring offshore for energy is critical to our future because it means jobs, energy independence from other countries and security for our state."

Rob, Chaney,

I'm writing about the upcoming permits for seismic testing off the Atlantic coastal states (expected in April). I know Gov. Haley supported both the surveys and offshore drilling, but was hoping for a comment on whether she still supports the seismic airgun blasting now that drilling won't be on the table for the next five years.

My deadline is at 10am tomorrow.

Thanks,
