SCDOT's Mike Bowman can be interviewed on any of the subjects covered. In addition, he has information about how fast a crash can create traffic back-ups measured in minutes and miles as well as other cause for delay that drivers experience when caught in a traffic tie-up due to a crash. Also, training modules will include the SC Move Over law and SC Quick Clearance Law. The intent is to provide training in clearing highway incidents faster and more safely for all agencies and services that respond to highway crashes.
