10 CENTS GALLON GAS SUBSTITUTE

REPORT ON SUBSTITUTE FUEL FOR GASOLINE FROM ERASMUS OF AMERICA

As Anderson, well known Washington correspondent once wrote, Wash., D.C. had known for over 40 years that alcohol was as good a fuel as gasoline. However, our government was out to please the oil industry, so pretended it didn't know that alcohol is a fine substitute for gasoline. Since New Zealand had no domestic oil supplies, Chrysler sent their cars prior to World War II modified to run on alcohol instead of gasoline. And in 1936, they solved the problem of starting these alcohol driven cars in cold weather by putting heat on the intake manifold under the float bowl. Once the engine was running, it had no further problem running on alcohol even at 20 degrees F. below zero and ran fine in any weather conditions. An earlier version of this article was fought to suppress it nationally. Apparently the oil boys didn't want the American people to learn how to get their auto and heating fuel for as cheap as 10 cents per gallon, even for free if you go all the way with the economy tricks. Even farmers can learn!

During the Arab oil embargo of 1973, surplus oil shipped from Africa, etc. was refused entry into America and had to be diverted to Canada, etc. This is how they created a fake oil shortage in America in 1973 and raised the price of gasoline in America without the American people catching on to the national trick just pulled

on them. And in the January, 1980 issue of Reader's Digest (30 million copies in January, 1980), they printed two articles documenting that another oil shortage in America claimed caused by Iran was actually a hoax engineered by the U.S. Republic. There was no real "Energy Crisis" as claimed by Washington propaganda. Instead, according to the Reader's Digest, Washington, D.C. put tremendous pressure on all oil sources to not buy sufficient oil for the domestic needs of America and Washington, D.C. rewarded the oil sources for shorting the supply of oil for America. This was how Washington, D.C. conspired with the oil interests to raise gasoline prices again in America through trickery on the trusting American people. Actually, other oil producing nations increased their oil production to counter-balance the Iranian oil shortage threat, but Wash., D.C. didn't want this surplus oil to be allowed in America and didn't want the American people to know that there was no shortage of oil for America as falsely claimed by Wash., D.C. lying like fury to the American people.

And a third gasoline shortage may be tentatively planned for 1995. They are introducing a new, lower performance gasoline that can undermine the present performance of your car and you will pay more for it per gallon. They plan to force you to buy it by removing the other versions of gasoline from the national market. As the Greenville News reported on Oct. 22, 1994, this may lead to gasoline shortages and long gas lines in America like happened in 1973.

The S.E.C. in Wash., D.C. suppressed at least 50 high gas mileage systems in America that threatened the oil cartel in America. The U.S. Postal Service years ago among other things suppressed the Fish Carburetor that ran on gasoline, alcohol, or kerosene and independent tests showed increased gas mileage for cars up to 30%. So unless you are super naive and gullible, you figure out whether Wash., D.C. is interested in serving the American people or the oil cartel so cozy with members of Congress, federal agencies, the White House, and key executives of the national news media.

Who makes these charges? Top secret intelligence files in Wash., D.C. credit me with at least twice saving America from pending nuclear World War III with the former Soviet Union by razzle dazzle tactics that tripped up Soviet intelligence. I once cracked Soviet security, and obtained for American defense the top secret nuclear attack plans against America prepared by the Moscow Institute For Nuclear Studies. I once tricked Soviet Intelligence into thinking America was going to suffer a later civil war so cooled their war plans against America and waited for the civil war that never occurred, and in 1990 when stuck, the F.B.I. came to me to ask me to solve who was behind the plot to assassinate Gorbachev when he arrived in San Francisco before this could trigger off World War III with the former Soviet Union. I solved the mystery for them and other intelligence services and showed them who was behind the plot to set America up for a pending nuclear World War III with the Soviet Union. I am a sharp boy in intelligence work and know the score what is happening in reality! I spent eleven calendar years in military academies and took to military intelligence work like a duck to water!

GASOLINE EXTENDERS:

1. Gasoline 70 Parts, Benzol 20 Parts, Methyl Formate 10 Parts

2. Gasoline 85 Parts, Methanol (Wood) Alcohol 15 Parts
3. Gasoline 60 to 90 Parts, Tertiary Butyl Alcohol 10 to 40 Parts
4. Methanol 50 Parts, Acetal 25 Parts, Gasoline 25 Parts
5. Gasoline 70 Parts, Alcohol 30 Parts. To this mixture add 6 Parts Isoamyl
6. Gasoline 60 Parts, Alcohol or Benzol 20 Parts, Acetone 20 Parts
7. Alcohol 40 Parts, Benzol 40 Parts, Gasoline 20 Parts

GASOLINE IMPROVER:

ADD 0.5% to 1% of the following mixture to gasoline to improve it:
Naphthalene 1 Part, Alcohol 5 Parts, Acetone 10 Parts

EMERGENCY MOTOR FUEL:

In case of emergency, you can use Coleman or other makes of stove and lantern fuel if you will mix with 50% gasoline.

FUEL OIL ACTIVATOR:

Naphthalene 100 Parts, Anthracene 7-1/2 Parts, Phenanthrene 2 Parts. Add 30 grams of the above mix to each 5 gallons of Fuel Oil to increase heating efficiency.

If you use more than a half & half mixture of an extender, be sure to put some brand name gasoline additives in your tank. You can buy these at any auto parts or department store auto parts department.

Anti-Knock Agent For Gasoline. Add 4 cc of the following mixture to each gal. of gasoline: Kerosene 40 Parts, Iron Carbonyl 40 Parts, Diglycol Stearate 20 Parts.

RACING FUEL;

Anhydrous Alcohol 91>8 Parts, Benzine 8.2 Parts

By enlarging the fuel jets in your carburetor by 40%, you can run your car on straight alcohol or alcohol and water instead of gasoline. A car can even run on 60% alcohol – 40% water mixture, but a ratio of 70% on upwards is best. You can run an oil furnace on alcohol or alcohol and water by increasing the size of the heater's fuel nozzle about 25% - a 90 degree nozzle works best – and then decrease the air adjustment until the flame is burning smoothly. It will burn with a clean, hot, almost invisible yellow flame. For more complete details on converting your car engine to run on straight alcohol or either gasoline or alcohol as desired for your car, send for the \$15.00 course on homemaking your own auto and heating fuel listed below.

The two cheapest mash ingredients to make homemade alcohol for fuel purposes: If on the farm, probably your own grown bushels of corn or wheat. If in the city, probably your neighborhood wastes (organic garbage) such as fruit and vegetable peelings; rotten, decaying food, plus grass clippings and leaves, or anything else that will support fermentation into alcohol.

Brewers' yeast as sold by health food stores or Fleischmann's Yeast as sold by local grocery stores will produce up to 18% to 20% alcohol in a mash mixture before the alcohol kills off the yeast.

The two cheapest ways to distill alcohol from fermented mash are either a solar still (can be built as cheaply as \$20.00 (1994 prices) and is described in our course listed below) or The G.I.'s Special From World War II which is to take a bottle, fill it with a liquid partially containing alcohol, put it into a snowbank or else stick it outside in freezing weather (32 degrees F. or 0 degrees C. or below). When the water froze, it would sink to the bottom and the alcohol would float to the top. This made virtually pure alcohol!

Both the solar still (which is a heat process) and the G.I. bottle trick (which is a freezing process) cost nothing in fuel to distill alcohol. Technically, a person correctly set up could even produce his or her alcohol for free by using free organic garbage and a cost-free still to operate such as a solar design or a free freezing process. HENCE FREE AUTO AND HEATING FUEL IS POSSIBLE! And you can legally distill alcohol by obtaining a federal permit for fuel purposes! (1984 statement of federal policy then!) (2013 notes added. Vaporize alcohol and you can increase gas mileage as any engine run on combustible fuels basically runs on the vapor of the combustible fuel plus the correct air mix to support the most efficient combustion possible. A strong electric spark encourages stronger combustion. Adequate air mixed in with vaporized fuel supports the most efficient and fuel saving combustion. Find a way to safely heat the fuel to be combusted and it turns into vapor better. Among tricks inventors have used is run a metal fuel line through the radiator system so the hot water heats up liquid gasoline or alcohol in this case so it combusts better in the car engine. When fuel combusts better, less fuel is needed at any given moment and yet done correctly you have all the power you need for your car.

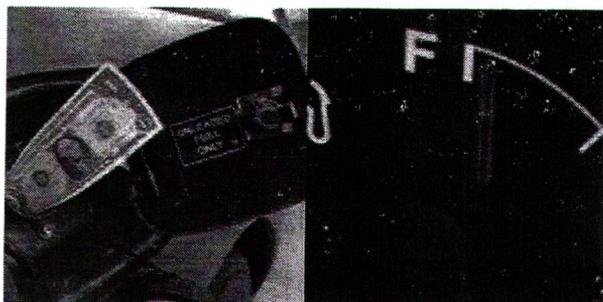

One technical warning here. Any combustible fuel turned into a vapor and mixed with air can be highly combustible if leaked out of the car so have one or two people who know how to handle cars well help you design a safe way to keep your fuel lines secure and protected against vapor leakage. Among tactics that some have used with any version of vaporized fuel is have one fuel line inside of another fuel line which is metal for protection against any fuel leakage. All information in this report is for educational purposes only and not for final advice as we will not be there to supervise you to see if you read and understand technical suggestions correctly. We supply experimental information for those who want to experiment with inventions, but all legal responsibility for how you might use this information is yours and not ours. That is why we suggest you get one or two people who are good technically with cars and with their help and advice, you then proceed if you want to convert your car, etc. into alcohol powered.

In this legalistic age, we have to be legal in statement when talking about experimental information for would-be inventors in America. In capsule form, one simple example shows where people do not always use common sense. Understand this and you can experiment with vaporized fuels so long as using common sense. All cars run on vaporized fuel. But it is not vaporized prematurely before the engine is ready to use it and combust it inside the running engine. You take a can which carried gasoline and you empty out the can. You still do not light

a match by the can with the can open to the outside air. Even fuel cans looking empty might still have vaporized fuel left inside but you don't see it. Vaporized fuel combusts efficiently with a spark. That is why it is good for maximum fuel economy meaning you go further per dollar spent on fuel for your car. But just handle it safely as your car already handles safely fuel that will be vaporized in part in your engine. If your car totally vaporized gasoline or alcohol, your fuel mileage could greatly increase as was demonstrated in tests by Shell Oil over in Europe over the years. End of comment.)

If ordering the course on homemaking alcohol fuel, the cost is \$15.00 by mail plus 6% SC sales tax if ordering from South Carolina. Send orders to NIFI, P.O. Box 1465, Seneca, SC 29679 . Make any checks, etc. out to NIFI and tell us payment is for "homemaking auto fuel course. However, we have added this course to our website, so you can feel free to order from the website if you want to. Also other products are listed on our website you are welcome to order! Our national website is www.fastboomamericaneconomy.com . Our email fastboomamericaneconomy.com@gmail.com And we suggest to send in an email saying "Add me to email list." Of course, give us your email address and name as we will have special releases at times. And by helping to circulate this report, you put intense pressure on the oil cartel to not raise gasoline prices in America.

You may distribute this report to friends and others you think should see this in America and abroad! Yours for God and Country, Erasmus of America (pen name for the one with many answers to solve the Energy Crisis of America and abroad. We will help the oil cartel to update their services to better serve the people everywhere. And with alcohol established as a real alternative if gasoline gets too expensive in the world, this will help the economies of nations across the world to not have runaway inflation due to fuel costing too much for nations.)

HOW TO HOMEMAKE YOUR OWN AUTO AND HEATING FUEL FOR AS LOW AS 10 CENTS A GALLON - REPORT \$15.00 + 6% SC TAX

Shows angles how to get your supplies to make alcohol even for free! And how to build a solar-powered alcohol still run by free energy. The big debate in first car industry was whether to run cars on gasoline and alcohol? Back then gasoline was cheaper. Now alcohol is cheaper! And you

can do this legally because federal law allowed alcohol production for fuel production. Report is 11 pages 8x14 including diagram showing how to build the solar still which is cheap and easy to build. [BRIEFLY - FREE ADDITIONAL BONUS REPORT] How one car was modified to go from 18 1/2 mpg to 94 mpg and was cheap to modify car. Written so even non-technical people can understand.

This website is dedicated to passage of our proposed Omni Law shown on our website. It is designed to give referendum power over the federal government to the American people who have lost effective control of government at this time of history. By referendum when required, the American people can force the federal government to have only laws and policies approved of by the American people and other anti-American legal measures cancelled by referendum of the American people. The U.S. Constitution is no longer respected as national law binding over Wash., D.C. nor our U.S. Bill of Rights of the U.S. Constitution which is supposed to be superior in legal authority over the rest of the U.S. Constitution so federal legal statute law can never be used to overthrow the legal rights of the American people. The Omni Law restores as supreme law our U.S. Bill of Rights and restores free enterprise as the major economic system of America, not Communism posing as radical agendas but not admitting to be Marxist in principle and practice. We intend to defeat the prophecy of Communist Khrushchev of Russia when broadcasting over American TV that our grandchildren would wake up one morning to find out that they were now living in Communist America. Unless we act now, the prophecy of Khrushchev will become the political reality of America.

Until the new current cap of \$100,000 is reached in actual cash received for the Omni Law Loan Program on our website at this time, we give a 10 times credit for every \$25.00 received for the Omni Law Loan Program. After the Omni Law is passed, you will be scheduled to receive \$250 back for every current \$25 loan payment into our Omni Law Loan Program on our website while this bonus offer lasts. Also receive later after the Omni law is passed some stated royalty in certain business angles that should give you some decent income from them as well. We think that patriotism should be rewarded in America for doing the right thing for America! - Erasmus of America (Pen Name for that American leader who descends from some American families who fought in the American Revolution in 1776 to found America as a nation and upon the

legal principles of God-given rights of the people that no government on earth could ever take away from them later on!) Note to people! Feel free to share and send this report to all Americans! Let's get the word out that the American nation born in 1776 is being restored to power and soon! And the radicals lose and cannot destroy America after that!

**ANSWER TO THIS INCORRECT CLAIM OF SALES TAX OWED TO SC.
GOVERNMENT:**

**First my background. Then you will understand why I give powerful
answers back that you did not expect. I am not a dumb hick easily falling
for con lines and bully tactics from state agencies such as the
Department of Revenue of South Carolina.**

**I came from a wealthy family and spent eleven calendar years in
military academies before going to the university as a history major. This
led to a heavy background in military intelligence. The F.B.I. when
meeting with me in 1990 was quite honest which surprised me when**

meeting me at my large retail store in downtown Seneca, SC. They said that their F.B.I. computer files on me rated me as one of the ten to twenty top military intelligence experts in America and if Wash., D.C. did not get the right answer fast, America might soon be in a nuclear World War III with the then Soviet Union. I supplied the answer that kept America out of pending nuclear World War III with the Soviet Union which could have occurred as soon as before 1990 was over or else next year the world war started! My enclosed report How To Make Your Own Auto & Heating Fuel For As Cheap As has been around nationally since 1994 and the F.B.I. has never charged the story on page 3 of this enclosed report is a lie or legal fraud. The paragraph includes the statement "Top intelligence files in Wash., D.C. credit me with at least twice saving America from pending nuclear World War III with the former Soviet Union (later says) : and in 1990 the F.B.I. came to me to ask who was behind the plot to assassinate Gorbachev when he arrived in San Francisco before this could trigger off World War III with the former Soviet Union. I solved the mystery for them and other intelligence services..." The senior F.B.I. agent of the two asked me why someone like me was in Seneca, SC rather than Wash., D.C. I replied that everyone watches everyone in Wash., D.C. and no one watches anyone in Seneca, SC and would never suspect that a major spy operation against the Soviet Union would operate out of an unknown place like Seneca, SC. I was up to date on the latest nuclear attack plans of the Soviet Union and used connections that I had secretly built up over the years.

When I was in Israel in 1974, Israeli intelligence met with me and said if I had let them know that I was coming to Israel, then they would have arranged honor guards for me at their military bases. They knew who I was and briefed me in on the whole Middle East situation, the current status of their nuclear program, Soviet plans for the Middle East, etc.

Unknown to Israeli intelligence, I had a major security breach on the Soviet side in Beirut, Lebanon and when they briefed their Muslim allies on their plans for the Middle East, I got current reports on what their Middle East plans were. Also, I had connections for Moscow that no one knew that I had. Somewhere along the way, I also cracked the security of the Moscow Institute For Nuclear Studies and obtained all the top secret nuclear attack plans against America of the Moscow military. I have as good of education in Russian nuclear tactics as Putin of Russia as I through a defector I located in the Western World was trained by the defector who used to train the Soviet generals in the most top secret nuclear attack plans of the Soviet Union for the annihilation of America.

By the way, while Israeli intelligence met with me as I did not arrange to meet with them, they offered me a starting rank of Colonel with the Israeli Army if I would join with them. I understood that this would be in military intelligence work though they didn't say that. They asked me to plant information with Arab intelligence services that would keep Israel and America out of a planned World War III starting with the Soviet invasion of the Middle East to capture the oil fields there and then take over the world by control of the world economy through oil. I tricked the Arab intelligence services by one of my original tricks that I was known for coming up with new angles all the time in military intelligence. And my tactics I dreamed up would work like a charm every time!

Privately I estimate that I kept America out of the pending nuclear World War III at least four times! The Joint Chiefs of Staff of the Pentagon thought I was a wild ace in military intelligence, but incredibly good at it and so secretly under oral charter from them operated to protect the national defense of America for a number of years afterwards. When I later asked them to cancel this charter so I would become just an private citizen again, they refused to cancel it which I guess meant that they wanted me to continue doing what I was doing for the national defense of America.

So I guess this leads to the legal grounds to drop this sales tax issue now in the name of national defense or else you commit high treason against America and the day may come in law when you will face criminal charges for this. Feel free to show this to the F.B.I. and nothing will happen to me. I know the same nuclear attack tactics as Putin of Russia and no one in the Pentagon can claim that. I also obtained the top ultimate weapon system invented by Nazi Germany but they lost the war before they could build it and conquer the world with it. I pulled in the top defense engineer of America in 25 years of the Cold War and we completed the Nazi ultimate weapon design and technology. My engineer friend when I showed him this Nazi ultimate weapon technology said that this was the most powerful ultimate weapon technology in military history and made "ABC" warfare obsolete. Old Cold War term standing for Atomic, Biological, and Chemical warfare. We decided not to turn our finished answers over to Wash., D.C. anticipating some future major traitor to America would arise in the White House. When the right leadership loyal to America is in power in Wash., D.C., then we can show the military how to build the Nazi Ultimate Weapon System that I nicknamed "The Wrath of God" as it is overwhelming in comparison to the ultimate weapons I studied in military school and also later learned about others through military intelligence sources.

One of my sources has supplied information that Isis plans to hit American targets with biological warfare. If this includes South Carolina, I think likely targets will be the nuclear generating plant near Seneca, SC, the big naval shipping port of South Carolina, Columbia, and Greenville, SC . I may be the only source who can stop this if ISIS targets South Carolina. My mother was once rated by I.Q. test to be the most brilliant child in American history up to then and my own I.Q. in Wash., D.C. was once tested to be one of the two highest ever tested in Wash., D.C. they said at the bank testing center run by a former college professor.

I lived in Wash., D.C. for years and have a startling background including studying with six of the most brilliant economists of America and Europe including the German economist endorsed by Albert Einstein and Sir John Maynard Keynes (rated top economist in the 20th Century - died 1946) as teaching the only true economic science in the 20th Century. An international organization representing the Who's Who of America and Europe once wrote me as the "Einstein of American Economics" as I had impressed economists so much with answers that I had. I got on the right side of economists when I successfully cracked the top economic secret of Nazi Germany how they rearmed Germany so fast with sophisticated economics.

An exile German captain who handled the security for Hitler's weekend mountain retreat once heard Hitler boast of the great economic secret of Nazi Germany which financed so rapidly the rearming of Germany and created full employment and prosperity almost overnight in Germany. It was code named "The Inverted Inflation" and Hitler explained why it was called that! I had figured Hitler out correctly and this impressed the economists so much that key economists and I became best friends overnight. That is why I suddenly got to train under six of the most brilliant economists of America and Europe. I got a million dollar education in economics for free! They were training me to be their successor in economic teachings. Col. Curtis B. Dahl of Liberty Lobby in Wash., D.C. contacted me when he got a letter from Wick Vennard, Sr. who was the most popular conservative economist in America then and he wrote that he rated me to be the most brilliant rising economic genius in America at that time. Col. Dahl wanted to meet with me after that and we did meet and became the best of friends then.

Starting with page 7 in the report enclosed "Bonus With Report..." it tells a bit about the giant food discovery that my father made and the Vatican and Soviet Union back then endorsed it as potentially the

greatest food discovery in human history as it could potentially solve the twin problems of starvation and malnutrition in the world. The Catholic Digest in the 1950's reported on this in a major article on behalf of the Vatican, etc. Wash., D.C. did not want this super food discovery available to the American people or other races on earth. University tests and medical lab tests from all over the world predict the soon biological extinction of the human race on earth if this great food discovery is not made available to the human race and soon! Wash., D.C. is crazy in this area and does not want this great food discovery for the American people nor other races on earth. Both Vatican and Soviet Union thought the family trade secret how this super food was made would make the nation with this industrial food process probably become the richest and most powerful nation on earth as all the earth would depend on it for the survival of their races and nations. When my proposed Omni Law is passed which is shown on my national website, then this food process will be shortly afterwards reestablished in America and may become the biggest industry in America and even the world. Obama from the White House has had all sorts of dirty trick operations pulled trying to block this from being reestablished in America. He is not on the side of the American people where it counts nor America as a nation!

I beat in state court a Jewish lawyer who it was claimed had never lost in any state court in South Carolina. He lost for the first time when facing me and two lawyers grinned at me as I left the courtroom after winning and gave a V for victory sign to me as I passed by! They had probably lost to him at some time and enjoyed seeing him beat in court for once. The Jewish lawyer looked like a sledgehammer had just hit him in court. When the chips are down, I have pulled off a number of legal upsets and won where it was said that I could not win. My mind militarily trained and having studied a lot of legal history how the laws came into being and what they were saying made me deadly to fight in legal issues. I once won a postgraduate college scholarship in political science after taking a national history test given to the top honor history students in American high schools. I guess I was rated the top history student out of American high schools that year! My knowledge of history has often made me deadly in legal issues and I win against big legal sources because I knew my legal history in key areas well!

I can make myself popular with some sources and unpopular with others when I tell the truth what real law is in America. Pro-Southern law: The Confederate States never legally surrendered to the Union because only a general in the field named Gen. Robert E. Lee surrendered. The Confederate Constitution modeled after the U.S. Constitution in many

areas required the Confederate Congress to authorize surrender of the nation and the Confederate President to sign the surrender papers. Never happened because Abe Lincoln was a lawyer himself and staged how the surrender would be handled. If he only accepted a military surrender of a Confederate general, then under law this was treated as a military surrender of a military insurrection in America. If he accepted the surrender of the Confederate Congress and President, then he was extending legal recognition that the Confederate States of America had been legally an independent nation under international law until they surrendered.

The Constitution of the State of South Carolina has this as the legal oath of the officials, etc. of the South Carolina Government: "I do solemnly swear (or affirm) that I am duly qualified, according to the Constitution of this State, to exercise the duties of the office to which I have been elected, (or appointed), and I will, to the best of my ability, discharge the duties thereof, and preserve, protect, and defend the Constitution of this State and of the United States. So help me God." Since they have sworn to uphold as law all of the U.S. Constitution as binding law over South Carolina as well, then we have this legal sleeper that was never cancelled by constitutional amendment: U.S. Constitution, Article I, Section 10: "No State shall make any Thing but gold and silver Coin a Tender in Payment of Debts;". F. Tupper Saussy in his book "The Miracle On Main Street" quotes from the constitutional convention that this passage on gold and silver coin was passed by Judge Roger Sherman and his allies so the U.S. Republic created by the U.S. Constitution could never legally pass laws to make printed currency or bank checks ever made legal money or legal tender under legal authority in America. Thomas Jefferson said of Judge Roger Sherman: "Roger Sherman was a man who never said a foolish thing in his life." The Americans who fought the American Revolution had been burned by the "Continental" as the revolutionary currency was called which afterwards became worthless and triggered off the American saying "As worthless as a Continental!" They didn't want paper currency again in America nor bank checks which was basically the same thing as not backed by either gold or silver banking. Basically under the legal terms of the U.S. Constitution, I have never been paid any legal tender in South Carolina under legal terms required of South Carolina under the U.S. Constitution as applied legally to South Carolina. Under law I have yet to receive any legal tender which is the fancy legal term for lawful or valid money under law.

I could easily push this as a legal issue since lawyers lack integrity towards the U.S. Constitution both federal and state level and even when promoted to judges they are not going to uphold certain sections of the U.S. Constitution as law which means that legal integrity in the legal profession is basically a legal joke and law is done by whim and not by legal terms of the U.S. Constitution. It is like the old joke. Two men walk through a graveyard site and one man notices the tombstone and reads it aloud: "Here is buried a lawyer and an honest man!" The other man then replied, "Wow, I never knew that they buried two men in the same grave!" This joke is satire and a comment on the legal integrity in the legal field in America both federal and state. Automatically I owe nothing in sales tax, etc. under the real terms of the U.S. Constitution to South Carolina.

However, for the sake of peace as why spend years in courts on issues that the courts do not want to rule upon with legal integrity, I pretend that the paper currency and bank checks that I receive are legally money which they are not. My revenues are small for this business as federal operatives stole \$525,000 from me and threatened me with murder if I tried to stop them and I have witnesses to this \$525,000 theft of money which was intended to block me from reestablishing in America my father's Vatican and Soviet Union endorsed great food discovery from being produced in America once more. Starting with 1 cent to my name to begin a business operation with again and a few videos to sell at a flea market to raise a few dollars, this is what I had basically after this \$525,000 was federally stolen from me in a very total criminal violation of law but no courts would prosecute the federal side for this. I have a witness who saw me start from this tiny beginning. I built up to where I could generate occasional sales for my listed business in South Carolina, but also arranged loans which I would repay once I turned the tide and I had the upper hand in finances again. The sales covered a few small expenses of business costs, etc. and the loans were secretly to arrange so I would have large finances later on for my father's Vatican endorsed industrial food process and could reestablish my father's trade secret industrial food process again in America. Keeping it blocked as information from federal hackers, and other criminals working for Obama in the White House, large financial commitments have been made that should become reality down the road. One commitment is for up to \$500 million to get this food industry started in America again. Other commitments are available too once the moment is right and some commitments are potentially large sums to get the food industry going again in America. My father had a setup maybe worth \$5 million when operational and supplied maybe up to 2,100 to 2,300 bakeries across America. Federal legal trickery destroyed his business which was self-

supporting with a good base of wholesale customers nationally.

Our scoundrels in the Revenue Department of the South Carolina Government try to claim that loan money received to promote the big side of this business picture is income are contrary to standard law which says that loans are not income. Also, people ordering from other states to South Carolina are not required to pay SC state sales tax under standard law and also Article I Section 9 of the U.S. Constitution says: "No Tax or Duty shall be laid on Articles exported from any State." The U.S. Constitution forbids South Carolina from treating loans as income and taxing articles sent to other states. I get orders from South Carolina, then they can be pressed to pay SC sales tax, but not orders from other states.

I enclose a sheet of legal rights of Americans I compiled so Americans will know that they have legal rights under federal laws and U.S. Supreme Court decisions. I can sue the daylights out of the Governor of South Carolina, members of the South Carolina legislature, South Carolina judges, and officials and personnel of the South Carolina Department of Revenue. This legal sheet of legal rights is enclosed. I report as sales what comes in as ordinary orders from other states which almost all my orders come from and as sales taxed sales when they come from South Carolina which is standard law. When I receive loans to back this pending food industry needed so badly by the American economy to boost and skyrocket it in national prosperity, they are not reported as income which is correct law for America. You invent fraudulent figures to try and extort out of me which I do not owe you. This is a criminal act by the officials, personnel, and agencies of South Carolina as this is a version of an attempted legal frame-up using fraudulent claims and falsified law to try and make look like a criminal act what is legal, valid, and no criminal act under valid law in America. I am legally provoked and expect you to practice correct law henceforth or else face legal actions that you will regret once I start them.

I have posted probably around 600 to 800 national reports on www.nesaranews.blogspot.com for the last three years or so. I write under the pen name of Erasmus Of America and apparently millions of people have read my national reports during that time. I have received comments from people all over America and from foreign nations who strongly like my reports and once we pass my proposed Omni Law in America, I have people in other nations who want to join us politically then and make this a worldwide movement to pass this same basic referendum law in all nations of the world as a freedom movement for all

of mankind. Many times I have talked with wealthy people and they say that they have read my national reports, like them very much, and I have friends and supporters all across America. I make sense to the people! I have publicized the Vatican endorsed industrial food process of my father and many other things talked about in this legal answer to you. The F.B.I. keeps quiet as they know I tell the truth and it would be legal suicide to try and legally interfere with me when I am legal in what I do. Actually probably most of the F.B.I. secretly agrees with me but can't say that publicly for career reasons. Just talking reality!

I was supposed to be doing business promotions today. Instead I am writing this to you as it is required. I do not tolerate my legal rights to be violated by you or anyone else! Don't try to provoke me. I have not made a final decision yet whether South Carolina gets one of my likely four or five regional food distribution centers once it is time to set them up. You act as a decent civilized government, things calm down between us. Try to be smart aleck with tongue-in-cheek actions and Georgia or West Virginia gets the giant distributor center when I set them up instead of South Carolina. I am hoping by two years to have them being built across America.

As I am more of a historian than you would be, read the Address Of The People Of South Carolina, Assembled In Convention, To The People Of The Slaveholding States Of The United States. It documents how the federal government was taxing by tariffs the Southern States to where it threatened to bankrupt the entire South and most of this money went from the South to finance and set up industry in the Northern States. It was the mast theft of money from the South to the North using Wash., D.C. as the front which triggered off the secession of the Southern States from the Union, not slavery. I am trying to mass reestablish major industry in the South and I want support of states I operate in, not harassing and other dumb acts instead of support as I am the main key whether the South gets giant new industry or not for the Southern economy.

I am sending copies of this report answering you incorrect financial claims along with the reports which go with it also to Gov. Nikki Haley, and to Rep. Greg Delleney, Chairman of the SC House Judiciary Committee and Rep. Bruce Bannister, Chairman of the Judiciary Constitutional Law Subcommittee. If I have to send everything by certified mail for you to admit receiving such as this, then you have no legal integrity and South Carolina then loses my support for several industries I was considering placing in South Carolina after the giant

food distribution center in South Carolina which likely will ship the food products also to Central and South America and maybe Europe. This is a giant for South Carolina to get and a financial disaster for South Carolina to lose. I only deal with civilized governments. Others I walk away from and never support again!

YOUR LEGAL RIGHTS PROTECTED BY LAW! by Martin Hunter,
NIFI, Box 1465, Seneca, SC 29679. © 1997. May be reprinted and sold if printed in full!

"People of a State are entitled to all rights which formerly belonged to the King by his prerogative." Lansing v Smith, (1829) 4 Wend. 9, 20. Prerogative means "Exclusive right: a distinctively superior advantage."

"It is true that at (English) common law the duty of the Attorney General was to represent the King, he being the embodiment of the state. But under the democratic form of government now prevailing the People are King so the Attorney General's duties are to that Sovereign rather than to the machinery of government." Hancock v. Terry Elkhorn Mining Co., Inc., Ky., 503 S.W. 2d 710. Ky. Const. §4. Commonwealth Ex Rel. Hancock v. Paxton. KY., 516 S.W. 2d. pg 867 (2) Cl 3.

"Under our form of government, the legislature is NOT Supreme. It is only one of the organs of that ABSOLUTE SOVEREIGNTY which resides in the whole body of the PEOPLE; like other bodies of the government (AGENCIES AND COURTS!), it can only exercise such powers as have been delegated to it, and when it steps beyond that boundary, its acts...are utterly VOID." - Billings v. Hall 7 CA. 1

"Our government is founded upon compact. Sovereignty was, and is, in the people." - Glass v. The Sloop Betsy, 3 Dall 6

"It is the doctrine of the common law, that the Sovereign (American citizen) cannot be sued in his own court without his consent (by terms of the compact called the U.S. Constitution and U.S. Bill of Rights added to the retained English common law as the national law of America beyond authority of Congress, courts, or agencies to ignore, disobey, amend by their authority, or terminate in authority)." The Siren vs. U.S. 74 U.S. 152

"State governments are but trustees acting under a derived authority (of the People) ..." 4 Wheat, 402

"...While sovereign powers are delegated to the agencies of government, sovereignty itself remains with the People, by whom and for whom, all government exists and acts." Yick Wo vs. Hopkins and Woo Lee vs. Hopkins 118 U.S. 356.

Those in government positions whether federal or state legislatures, courts, or other agencies who refuse to legally respect and uphold the retained English common law rights of the American people, rights protected by the U.S. Bill of Rights from legal attack or interference or denial of practice in America, and statute civil rights granted in addition to these permanent legal rights which no government in authority can take away from the American people, any government agent or source engaging in such legally void action or policy is legally guilty of dereliction of legal duty, malfeasance in office, perjury of their oath of allegiance to uphold the U.S. Constitution and attached U.S. Bill of Rights, and guilty of technical legal violation of treason against the U.S. Constitution, Article III, Section 3 in waging legal warfare against the American people and their legal rights and in adhering to the enemies of the American people who want the U.S. Constitution overthrown by internal coup within government (federal or state) in America. Let the following now legally warn those of any legal capacity who may conspire or actively engage in attempted legal violation or suppression of any legal rights of the American people beyond the delegated authority given to government by the absolute sovereign authority of the American people who are the master to all legal authority and not servants to would-be legal usurpers who wish to overthrow the legal authority of the American people over all government including courts in America.

"The United States adopted the Common Laws of England with the Constitution." Caldwell v. Hill 176 S.E. 383 (1934)

"Law of the Land means the Common Law." Taylor v. Porter 4 Hill. 140, State v. Simon, 2 Spears, 761, 767

42 U.S.C. 1983 - "Every person who, under color of any statute, ordinance, regulation, custom or usage of any State...subjects, or causes to be subjected any citizen of the United

States...to the deprivation of any rights, privileges, or immunities secured by the Constitution and laws, shall be liable to the party injured in an action at law, suit in equity, or other proper proceeding for redress."

Webster defines a Republic as: "...a state or nation in which the supreme power rests in the body of citizens..."

"ALL LAWS WHICH ARE REPUGNANT TO THE CONSTITUTION ARE NULL AND VOID." - Marbury vs. Madison 5 U.S. 137, 174, 176

"No one is bound to obey an unconstitutional law and no courts are bound to enforce it." 16 Am Jur 2d § 177, late Am Jur 2d §256

"ALL PERSONS ARE PRESUMED TO KNOW THE LAW. IF ANY PERSON ACTS UNDER ANY UNCONSTITUTIONAL STATUTE, HE DOES SO AT HIS OWN PERIL. HE MUST TAKE THE CONSEQUENCES." 16 AM JUR 177, 178

"Search And Seizure Manual for Law Officers, page 16: "The loss of evidence isn't the only bad consequence of an officer's error in search and seizure. The officer may also be prosecuted by the US Department of Justice for depriving the Citizen of his Rights and may be sued in the federal district court. Juries have awarded Citizens up to \$250,000.00 for unlawful searches and seizures. This means that the officer may be laying his house, car and savings account on the line when engaging in unwarranted searches and seizures."

18 USC, Criminal Code, §241 Conspiracy Against Rights of Citizens: "If two or more persons conspire to injure, oppress, threaten or intimidate any citizen in the free exercise or enjoyment of any right or privilege secured to him by the Constitution or laws of the United States, or because of his having so exercised the same;...They shall be fined not more than \$10,000 or imprisoned not more than five years or both." Nothing here states that IRS agents, FBI agents, state police, etc. are exempt from this federal criminal law!

Supreme Court: Bivens v. Six Unknown Agents, 403 US 388, 29 Led2d 619, 91 SCt 1999 (1990): When a government agent acts in an unconstitutional manner, the agent as of then becomes personally liable for monetary damages.

Stokwitz v. US: Taxpayer alleging unlawful seizure and subsequent use of acquired tax information can then pursue legal remedy through a Bivens suit or other tort action.

Hollingshead v. United States 85-2 USTC 9772 (5th Cir. 1985), ruled, 26 IRC Sec. 7421 is a Waiver of sovereign immunity by the government for a Citizen now claiming that his or her property has been subjected to a wrongful levy.

Supreme Court: Blackledge v. Perry, 417 US 21, 40 Led 2d 628, 94 SCt 2098 (1974), Guan v. Dergurgur, 800 F2d 1470 (9th Cir. 1986): It is an unconstitutional deprivation of due process of law when the government penalizes a citizen merely because he or she has exercised any protected statutory or constitutional right.

In Bothke v. Flour Engineers, 713, F. 2d 1405 (1993) the U.S. Court of Appeals ruled that, when a taxpayer informs an IRS agent that he believes that there is an error in assessment and the agent still continues levy action, without first determining the merit of the taxpayer's argument, such agent loses his immunity from a suit.

26 USC 7214 (a) UNLAWFUL ACTS OF REVENUE OFFICERS OR AGENTS. Any officer or employee of the United States when acting in connection with any revenue law of the United States and violates any section of this act as to criminal or wrong doing, shall be fined not more than \$10,000 or imprisoned not more than 5 years, or both upon conviction by the court.

Meriwether v. Coughlin, 879 F2d 1037 (2nd Cir. 1989): When an official has actual or constructive notice of unconstitutional practices and fails to act in "deliberate indifference," then supervisory liability may be imposed under Title 42, Sec. 1983. He can be sued!

ONE OF THE EASIEST FREE ENERGY MACHINES TO BUILD IN WORLD! FROM ERASMUS OF AMERICA - NOV. 17, 2015

Balls called planets spin around in our solar system and without friction to stop them. What is to say that they might not spin for eternity in orbit which could be claimed to be a form of perpetual motion in nature?!? Actually as Nikola Tesla (super genius in electricity) said, we are surrounded by energy that we cannot see. I scientifically do not believe that we can create energy out of nothing. However, we can tap energy that we cannot see to run machines that we do see running before us. According to your standard scientific teachings, atomic structures have electrons in them which run around in orbit within them for all eternity in "perpetual motion" or else our earth, universe, life, etc. would soon all collapse and disappear into nothing! Like Albert Einstein said, the more I learn of science, the more I believe in God. The infinite genius shown in how the universe runs

basically eternally can only be explained by God according to Albert Einstein when he was alive.

Having run the National Institute for Inventors pretty much nationally and internationally since 1990, I have had access to many intriguing technologies that the public does not know about. From now through November 24, 2015 this offer is available. I will show you the design for what maybe is the most simple concept in a free energy motor that you could see, but I do not call it a perpetual motion motor in the sense that it creates energy out of nothing. Rather in a sophisticated way that I will not go into the lengthy scientific explanation of why, I judge it is a manifestation of gravity as a source of energy and not just force as labelled by definition of physics. The research work of four technical brains known by many in inventive work helped suggest this concept of a simple motor to make which runs on invisible energy according to test results of their experiments as reported on in their reports, but looks like it runs on nothing.

A friend of mine back in 2013 saw on the internet a source showing the same basic design as this one I will show you, but a bit more sophisticated and showed it working on the internet. This design is so simple that it could be built even in a kitchen would still logically have the potential to generate electricity for a small project on up to maybe even a house good weather or bad if you built a big enough unit. . It might be more commitment of work but logically might even power a small toy car for a child that he could play with as it ran on its own power or built big enough for him to ride in as a play car! Variations of this could power much bigger things including maybe regular cars, homes, etc. I will also give you the lead in a booklet released for the internet showing many other devices that people reported worked as free energy machines or generators for electricity, etc. These are colored illustrations

of many free energy devices reported to work for real, and information on where to go more total information on them to build them including patents on them if they exist! Patents are probably all expired by now so free to use regardless if so!

You may not ever have access to information like this again. I step on powerful toes by releasing this and just insuring that technical answers like this exist in case society collapses or whatever! Maybe society could be rebuilt with answers like this after a world war. Or save on energy costs if no war starts to disturb our national peace.

The Omni Law Loan Program is on my website www.fastboomamericaneconomy.com Also, copy of my proposed Omni Law on this website. Once passed as national law it gives Americans back control of the federal government by referendum power over Wash., D.C. when necessary to get the government back under control of the American people when the federal government loses all control and no longer faithfully serves the American people and America as a nation.

I had intelligence sources inside Muslim circles in America who secretly reported to me that the secret Muslim plan in America was mass disruption of America by Muslims across America, total takeover of the government by Muslims who already control much of the executive branch of government as Obama has been placing Muslims in control of most of key national security in America and the U.S. Armed Forces are being set up for Muslims to later control the U.S. military as well. Once they control the government, then they are scheduled to kill all Jews and kill all Christians who do not convert to Islam in America. As this report is being written, Muslims are killing Christians all across the Middle East and Obama looks the other way. Putin of Russia said that he would not allow this mass slaughter of Christians in the Middle East

to continue, so was militarily intervening in the Middle East to stop this mass slaughter of Christians in the Middle East. The Archbishop of Moscow, Russia backed up Putin with a proclamation that the people of Russia backed Putin in his effort to save the Christians in the Middle East from being wiped out by the Muslims. All this was censored from your regular news released in America. Obama who was caught admitting several times that he was also a Muslim turns his head the other way when Christians are massacred anywhere in the Middle East.

In this inventory of free energy devices that you will be given information on and where to get total details on how to build might be a few that launch you into a giant business or industry if you see the potential to what you now have access to. The one free energy device first described in this report, you are given the basic information how it is built. If you understand a little of science, you might be intrigued how easy this is to understand for even the average person with a little touch of technical common sense.

You put in \$25.00 or a multiple of that in our Omni Law Loan Program shown on our website and by Nov. 24, 2015 through our website or postmarked an order to us by Nov. 24, 2015 and you will automatically receive as a free bonus our Free Energy Information Design and Package. The package refers to the leads on the many other free energy machines and devices that people have reported worked for them! Again if they work as reported that they do work, they work because they tap energy that exists but you do not see, not because they create energy which I do not see them doing according to standard scientific training that I have. Give us your email to send this Free Energy Package to. If you do not have an email to supply us, then send us an extra \$5 for printing and shipping along with your \$25 or multiple for our Omni Law Loan Program. We print

up the free package but just give you the link for the free downloading of this nearly 3,000 page book on free energy devices and how to build them! If placing an order by our website, the website is www.fastboomamericaneconomy.com Go to Products and click or else Omni Law Loan Program to get a Paypal button to use for the Omni Law Loan Program. If you can't use the website for payment, send to our mailing address of NIFI, P.O. Box 1465, Seneca, SC 29679 . Make checks, etc. out to NIFI and tell us what the payment is for. This loan money raised will see that the Omni Law gets passed in America and soon but we don't want to tip off enemies of Christianity in government our plan how to swiftly win in America. We have had many "dirty trick operations" pulled on us by federal operatives under Obama trying to stop us from winning in America and they are trying to find out how we plan to swiftly win as I have a good reputation in military intelligence files in Wash., D.C. that I normally achieve my objectives in cunning plans that I set up to defeat the other side. Also, once the Omni Law is passed, I will be able to set up my father's Vatican endorsed industrial food process which should become the leading food supplier in America and the world after set up correctly. Both Vatican and Soviet Union during the Cold War endorsed my father's great food discovery as the greatest food discovery in human history and should end starvation and malnutrition in the world. Heavily paid off behind the scenes, Wash., D.C. has for one half century pulled illegal criminal acts to block the reestablishment of my father's Vatican endorsed every time I had the money raised to reestablish my father's industrial food process in America. It was written up in the Vatican newspaper many years ago, Congressional Record of Congress, and many other prominent publications including the Catholic Digest during the 1950's telling of the power struggle over this great food discovery of

my father. The nation having this great food discovery can become the most powerful nation and likely richest nation in history according to both Vatican and Soviet Union assessment back then during the Cold War. With terms stated on my national website, those backing my Omni Law Loan Program with loan money which is the drive to pass the Omni Law in America, they get their credited principal paid back to them after the Omni Law is passed and also get a pro-rata share in some of the royalty on profits from the Vatican endorsed industrial food process for 30 years from when the industrial food industry is set up and starts generating national and world sales! 10% of net profits before taxes is divided up pro-rata on number of \$25 loan credits those have in the Omni Law Loan Program per terms already stated. This is not a stock offer as no title is involved which can be sold or transferred to others. We may change this legal status after the Omni Law is passed, but for now this is just a royalty arrangement on net profits for 30 years before taxes until and unless we decide to change the status of this offer later on.

Since I am the only one trained in this family trade secret industrial food process by my father, it is a family trade secret process and I intend to maintain this status for the 30 years plus after this industrial food process is reestablished in America. And university tests and medical lab tests from around the world predict the soon biological end of the human race on earth if this is not added to the American and world food diet in time. The medical labs predict the soon extinction of the human race like the dinosaurs disappeared from the earth if this is not soon added to the human diet on earth. I have the most valuable industrial food process in human history and any legal source trying again to block this great food discovery from reaching the American people and other races and nations on the earth is guilty of massive criminal violation of the Genocide Treaty which is lifetime imprisonment

if prosecuted in America under the Proxmire Act which is the Genocide Treaty in statute law from Wash., D.C. If prosecuted abroad by maybe 50 to around 200 nations across the earth, it is execution under international law according to the legal policy set up by the Nuremberg War Trials of 1945, etc. and called "crimes against humanity" during times of peace or else wartime. And required basic execution under international law if found guilty by international trial.

I had \$400 million committed to back me in 2014 and the Obama boys under White House instructions apparently sabotaged this \$400 million committed in 2014 to back the reestablishment of this great food discovery prophesied in Exodus 23:25 as would be God's great gift to mankind in food for health to give mankind long life and good health on earth. Obama did not want this for America and the world, so blocked it by tactics violating the legal terms of the Genocide Treaty signed into national law by President Ronald Reagan when in the White House.

This following refers back to the Free Energy Package of information. As I am releasing technology that could change the direction of the national and world economy if smart people follow through, I may never offer this exclusive information again to you or anyone else of the public. Because of the recent bombing in Paris, France, I am releasing this information one time in case society gets into trouble over ISIS, etc. and this technology may give you an edge to help rebuild your area and society with. If society is in trouble, you can teach others this technology supplied to you!

Yours for God And Country (pen name for the champion of inventors in America and worldwide. It is the inventors who can boom economies and give mankind a blessed financial future on the earth! Most of the prosperity of America came from

inventors with their answers such as Thomas Edison, Henry Ford, Nickola Tesla, etc. Inventors should not be suppressed by Wash., D.C. as happens too often with answers that are too good in results according to Washington corrupt standards. I would estimate that the American economy would even be five times richer than it is and with much more jobs in America for all if talented inventors had not been criminally suppressed by Wash., D.C. for totally corrupt reasons and contrary to valid national law!)
