Subject: Self Direction Conference: One Week Away!

Greetings,

The Self Direction Conference is only one week away! We are looking forward to seeing you in Baltimore, MD on May 8th and 9th. [Online registration](#) is still open and you can view the agenda on our [website](#).

We'd also like to give a special thank you to our lunch co-sponsors, Annkissam, Centene, and CYMA, and our breakfast co-sponsor, Anthem.

Annkissam: [Annkissam](#) was founded in 2007 to provide innovative, affordable technology solutions for mission-driven organizations. Annkissam is the leading national software provider of Financial Management Services software in self direction. Annkissam specializes in workflow software for Home and Community-Based Services. FMS Engine, F/EA Blueprint, 941R Express and EDI Autoclaim are some of our products.

Centene: Founded as a single health plan in 1984, [Centene Corporation](#) (Centene) has established itself as a national leader in the healthcare services field. Today, through a comprehensive portfolio of innovative solutions, we remain deeply committed to delivering results for our stakeholders: state governments, members, providers, uninsured individuals and families, and other healthcare and commercial organizations. At the heart of our business are the reasons behind what we do day-in and day-out. In addition to managing the healthcare of our members, we also manage our economic, social and environmental impacts, as well as our relationships in the workplace, the marketplace, the delivery chain, the community, the industry and the public policy realm.

CYMA: [CYMA](#) produces integrated payroll and accounting software solutions. For nearly a decade, CYMA has focused on the payroll and reporting needs of directed services using the Fiscal/Employer Agent model. With CYMA's design, consumers and attendants are available under one company, making the Schedule R process efficient and easy. Other industry specific features like tracking budgeted amounts and hours for attendant care, tax payment processing by consumer, and support for household workers including SSI/Medicare refunds help directed services manage operations and payroll more smoothly. Review the solution at www.cyma.com.

Anthem: Most people want more control to choose the best options available for their services and supports and to choose who provides them. At [Anthem](#) we are committed to you and respect your choices and preferences. Our services are designed to be helpful to you—and self-directed services ensure you are in charge of your choices, goals and independence. As our nation considers a path forward, let's keep it simple and build programs that support people to make decisions about their lives at home, with their families and in their communities. Anthem is proud to support further development in self-directed models that work for everyone.

Best,
The NRCPDS Team at Applied Self Direction
