South Carolina State Parks

at 19:26:49 on 8/28/2018 UTC

On this hot day, let's talk winter! Ripe persimmon fruit are starting to drop at Lee State Park. What do the seed kernels say about our upcoming winter weather? According to the Farmer's Almanac: "If the kernel is spoon-shaped, expect plenty of snow to shovel. If it is fork-shaped, plan on a mild winter with powdery, light snow. If the kernel is knife-shaped, expect frigid winds that will "cut" like a blade.".....

I think y'all better get those shovels ready! <https://southcarolinaparks.com/lee>

Nikki Rosier Miller I hope so!

Peter Bendal Kear ROTFLOL! I live east of I-95. Can someone please tell me what is this snow and why would I need a shovel for it?

at 19:43:23 on 8/28/2018 UTC

Dave Taylor I heard this morning that El Niño is heating up with a vengeance! So even here in the UK, it's already some degrees above average for the time of year.

region—for winter, spring, summer, and fall!

2018-2019 WINTER WEATHER FORECAST: UNITED STATES

ABOVE-NORMAL TEMPERATURES (ALMOST) EVERYWHERE

This winter, we expect to see **above-normal temperatures almost everywhere in the United States**, except in the Southwest, where we're predicting a colder-than-normal season. Our milder-than-normal forecast is due to a decrease in solar activity and the expected arrival of a weak El Niño, which will prevent cold air masses from lingering in the North.
