Subject: Documents Which May be of Interest to Governor Nikki Haley as U.S. Secretary of State

To Whom It May Concern,

Greetings!

In the event Governor Nikki Haley is selected as U.S. Secretary of State under the Trump-Pence administration I believe that there two documents that may be of interest to her in this role; these documents are briefly mentioned below.

The UN Launch Site: A Means of Uniting Countries through the Exploration of Space

The purpose of this document is to describe a rocket launch site that all member states of the UN can use to construct and launch spacecraft for space explorations. Thus the goal of this launch site is to unite countries for the purpose of exploration space, which will lead to more peaceful relations between countries.

The Artificial Barrier: A Means of Saving Lives and Protecting Cities in Washington State during Lahars

The purpose of this document is to describe an artificial barrier that will save lives and protect the Cities of Auburn, Enumclaw, Kent, Orting, Puyallup, Renton and Sumner by diverting lahars (or debris flows) of an understood volume and height, such that these Cities do not become inundated when Mount Rainier erupts.

In the event the Governor is desiring to read these documents please send me a request, these documents will either be mailed or e-mailed, this is dependent on her likeness.

As representatives of Governor Nikki Haley I would like to thank you for your willingness to share this invitation with her.

Genuinely,
Timothy M. Young
