DID YOU KNOW when pinecones get wet they close, and when they dry out they open back up again? Whether you did or not, Ranger James is here from Aiken State Park to show you how -- and why -- this happens! Tune in. You may be amazed.

Then tell me....should the pinecones around the state be open or closed right now?

Sandy Aldridge Miss seeing the Rangers at this park 😊. We moved and loved going into Aiken park daily.

Hello Rangers, keep up the wonderful work you do.

Laura Snow Hawkins Diane Davis Gibson it can vary but for the most part female cones are toward the bottom of the tree and have much more prominate, defined scales. Here's a great link for more detail. <https://sciencing.com/differences-female-seed-pine-cones-8094513.html>
