

Dear Governor Haley,

I'm writing in support of friends who work at the Century Aluminum plant. Whatever support you can lend in the negotiations between Santee Cooper and Century Aluminum would certainly show the Century's corporate team that we will do all that is possible to save jobs here in South Carolina.

I'm not one to write letters so while in the mood I would like you to know that I am so impressed with the job you have done in representing South Carolina. In response to crisis situations like the Mother Emmanuel Church shooting or this Thousand Year Flood your quick response and heartfelt words have been just right for healing and weathering the storm. Thank you. May God bless you!

Sincerely,

Dean Infinger
