The Honorable Nikki Haley

800 Richland Street

Columbia, South Carolina 29201

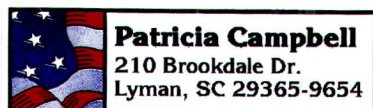

Dear Governor Haley:

I attended a very disturbing meeting last night in regards to the refugees coming into South Carolina. This should be a definite NO for our state as well as for the United States. These refugees are not vetted and no one knows what their intentions are or what they will be in the future. As far as I am concerned, we are just putting ourselves in a position for another tragedy as in 2001, or even worse. The majority of these refugees are young males and they are being instructed to come to America, learn to speak some English, get their supplies and execute. People need to get their heads out of the sand and stand up against this terrible problem. We are just asking for it.

Not only will this affect our nation as a whole, it will also have a huge bearing on all of our government entities. We are over-burdened now with so many on welfare, getting free prescriptions, free doctor visits and basically everything they need – this I know to be a fact, because I know many that know how to work the system. And work the system they do!! The average American citizen can barely support himself and his family and when all of these refugees come, it is definitely going to take more money to support them. We need to look after our own people, especially since the refugees being sent over here are a huge threat to our society. WAKE UP GOVERNMENT. Your first obligation is to the citizens of South Carolina and our wellbeing instead of adding more fuel to the fire. People are getting sick and tired of working and supporting those that don't or won't work and doing without ourselves. Sure, I understand why everyone wants to come to the United States and realize the American Dream. But, these people are not coming for the right reasons. Look how many Mexicans are here already - don't pay a penny in taxes, many living together and guess what – the majority are sending their money back to Mexico. These are the people that are enjoying the good life –not us. AGAIN, WAKE UP GOVERNMENT.

I happened to have a daughter who was widowed at a young age, trying her best to raise two young men – one a senior in high school and another a junior in college. Do you think she gets any help. NO. On top of this and to add insult to injury, the social security system has now decided that the one in high school should receive his check from his Dad's death and not his mother – the very one that sends him to school, clothes him and feeds him. The college junior had his money cut off once he got out of high school. This is the very time that the money is needed the most. One good thing out of this is that the senior in high school knows that his portion is needed by his mother because he well understands that she is the one that supports him and it will be given to her. But tell me one thing, who is looking out for her and the welfare of her children trying to get a good education so that they can support themselves. It is amazing that there is no money for the necessities such as this, but oh yes, there is plenty of money to go around for all of these illegals coming into this country. WAKE UP GOVERNMENT.

Our government, state and local, need to put the citizens of this state and our country first NOW. YOU ARE ASKING FOR A DISASTER!!

A handwritten signature in cursive script that reads "Pat Campbell".
