

LOWER SALUDA RIVER

COLDWATER TROUT REGULATIONS

PUBLIC COMMENT

CURRENT REGULATION

No more than five total combined, per person, per day of brook, brown or rainbow trout. Only one fish can be greater than 16 inches. No bait or tackle restrictions. Fish must be landed with head and tail intact.

PROPOSED REGULATION

The establishment of a special management zone for all coldwater trout. The special management zone would establish a catch-and-release-only zone between the eastbound lanes of Interstate 26 and Stacey’s Ledge, an approximate 1.3 mile stretch of river.

Regulations will remain unchanged in all other waters of the Lower Saluda River.
