I am signing because I had endometriosis and had to have a Hysterectomy at age 28. When they opened me up my appendix was weeping. There were fingers shooting off every which way. I lost some of my intestines and so much more. From being on hormones for so long I ended up having a pulmonary embolism when I was 39 and almost died. Yes, I was in ICU for 3 months and a regular room for over a month. I am now 52 and since I can no longer take hormones life is quite different from normal women. Also, this disease has caused me so many other problems, which in turn has led to many, many different surgeries..

I know someone affected and was only recently educated as to how horrible this condition can be.
