Letitia, thank you for your patience.

Total estimated cost to date: \$870 million

The estimated total direct cost to state government is \$114 million

The estimated total direct cost to the federal government is \$493 million

ON BACKGROUND: As the governor has said all along, we will not have a final number to share for some time (final costs will account for non-profit activity, private loans, claims that are still open, and out of pocket costs). This is the best estimate as of today. The difference between the two numbers (state/fed) is that the total number includes SBA loans and private/flood insurance.

Hi Chaney,

This is Letitia with Reuters. I was following Gov. Haley's press conference but wanted to double check if she shared the total estimates on the flooding damage and financial impact. And as she shared a lot of numbers specific to different agencies, would it be possible to get a total on the cost of the storm? Please let me know if it's a simple matter of just adding all together.

Thanks much,  
Letitia
