HOW TO ADD FROM 40 YEARS TO 100 YEARS TO YOUR LIFESPAN AND IMPROVE YOUR

HEALTH IN OLDER AGE. THIS IS BASED UPON A 40 YEAR LAB TEST WITH A CHICKEN HEART. FROM ERASMUS OF AMERICA - MARCH 12, 2018

I am good at taking scientific discoveries and figuring out practical ways how to apply them to our human life. Had two tumors and advanced colon cancer and took a raw lab discovery and knocked out the two tumors each in 4 days flat and the advanced colon cancer totally knocked out in six days flat. Think this was in 1987 and tumors and colon cancer never came back. And didn't know in advance that this system of tumor removal would leave no scars. Medical field was not interested in this inexpensive natural product answer which worked for me and was permanent in results for me.

Took a car of mine getting a gas mileage of from 17 miles per gallon on up to 18 1/2 and took two inexpensive gas devices designed to help improve gas mileage a moderate amount and put them together as a united system and did one modification with the car engine which cost nothing to do and so for less than \$50.00 in expenses got my car suddenly up to 94 miles per gallon in a witnessed public test. Got private threats to stop my experiments for ways to improve gas mileage or else! Got threats passed on to me from a gas station friend of mine speaking for higher ups and friend with auto supply store told over the phone to pass on to me threat to me of legal frameup, etc. if I continued testing ideas of mine for higher gas mileage on cars. My ideas seem to basically to always work when I see something scientific done with implications to it and then put my ideas to a test or tests to get practical results based on my invented system of scientific and engineering and natural health products logic I called "stacking" and intrigued inventors, engineers, and scientists how this system of practical logic actually worked to create new results in the technical fields used in.

"Stacking" system logic of mine now has a brainstorm again how to take a chicken heart experiment which lasted for 40 years and then apply this to humans to increase lifespan from a potential 40 to maybe 100 year lifespan and improve health for older age as well! I need some volunteers to test my inexpensive health product idea to see what this does for their health. Health product is quite safe to use but just has not been used for this special targeted area of health. I have never had a failure with my stacking concept of inventing new practical answers for human use and see no reason why this should not work and the only question is how much will this add to your lifespan and how much will this help to improve the health of your body over the years.

My father with no technical training, just an education in liberal arts

with the University of Chicago suddenly got this idea for a new health food and results so sensational according to university tests that both the Vatican and Soviet Union during the Cold War endorsed this food discovery of his as potentially the most important in human history and could end malnutrition and starvation in the world. The Catholic Digest in the 1950's ran a detailed report on this classic food discovery of my father. Plan to get this back in the food market of America which was getting strong at one time until Washington corruption (boys were paid off in federal circles according to Senator Everett Dirksen of Illinois to use federal government to pull dirty tricks to block this. He said that an apparent \$40 million in bribes was paid out to members of Congress and heads of federal agencies to sabotage this any way they could. He told my father this around 1960 which blocked the American food industry from taking over the world food market with this.) Soviet Union predicted the nation ending up with this could become the industrial leader of the world with this and potentially richest nation on the earth. But corrupt Wash., D.C. has fought me since I left the university to block this again and again by any dirty means possible which corruption gave me inspiration to write up my proposed Omni Law shown on my website to restore legal integrity to the government and making it once more the servant of the people instead of their intended master over American life by massive regulations removing most of our legal rights under law in America. But I am building up a powerful hand to finally get this back on the food market and this time turn it into a world food market. Soon I will "march over the Rubicon" and win in America by passage of my proposed Omni Law.

My mother's father originally was studying to become a Catholic priest but kept inventing things. They finally suggested that he was not cut out to be a priest so instead became an inventor who invented around 700 inventions used in America. He had no technical training, just tons of common sense in inventions that he came up with. I sort of startled my parents when I began inventing things at around the age of 6 or 7. Inventing talent comes with the family genes for some reason or another. I would have had a number of industries started in America, but step on toes with answers I

come up with so Washington corruption fights me every time I come up with a good new industry for America. When my Omni Law is passed in America, then the suppression of inventors in America stops and America skyrockets in industrial growth and increased wealth of America as a nation. Thomas Edison was maybe the last free inventor to give America constant new national industries such as the movie industry and recording industry for America before Washington regulations mass crushed most inventors in America. I have had the privilege of knowing many brilliant inventing minds in America, but most of the time suppressed by Washington corruption as being paid off behind the scenes is more profitable than a straight federal salary in the usual federal agency in Wash., D.C. For example Hillary Clinton had a book written on her Clinton Foundation and health discoveries they had suppressed in exchange for being paid off to do so or made money other ways by suppressing good health discoveries made in America. A health institute published this book listing health discoveries suppressed by the Clintons.

Corruption wins again in Wash., D.C.! A few years ago I had approved a \$400 million commercial loan approved to set up again in America my father's Vatican endorsed and also Soviet Union endorsed trade secret industrial food process for what both sides endorsed as potentially greatest food discovery in human history. And as soon as I got this food industry started in America then this commercial loan would be cancelled and turned into a grant to set this food industry up with. Was not publicizing this huge loan lined up and approved after they read my documentation on this great food discovery of my father. But C.I.A. was already reading my emails and listening in on my commercial phone so knew all about this loan deal lined up. Then suddenly after C.I.A. told Obama I had been approved for this large commercial loan, suddenly I was told it was cancelled as Obama White House did not want this for America. C.I.A. told Obama about this food industry about to be set up in America and suddenly "Pres." Obama born outside of America in Kenya as everyone in intelligence knew now served his secret masters in turn and cancelled this new industry for America as his masters did not want this for America and the

American people. See now why I say you have to have passed in America my proposed Omni Law shown on my website to restore honest government back to America as corrupt politicians don't want the government to be honest? For example big bribe money made off of the high cost of running a national federal health program in America. Allow too many good health discoveries made in America and much of the cost and (profit made off!) of a federal national health plan now eliminated for the federal government making health care much less expensive in America. The corrupt did not want that for America and the American people. Americans too healthy not good for the corrupt making excessive profits made off of a corrupt national health system run in America.

Now back to my "Stacking" concept on how to mass increase our lifespans in America and improve health in older age as well. Wrote above material on crushing most inventors in America in order to give you the legal opportunity to try out my "Stacking" concept for your good health and longer life on earth. Washington corruption gets too exposed and they can't be as obvious in their corruption game to block from the American people important discoveries and answers in national health and other technical fields of America in order to please corrupt interests behind the scenes. I had taken for several years a certain natural health product which is good for general health and to help strengthen the heart so you shouldn't get heart attacks while taking it. The company I bought from went out of business and I got out of the habit of buying it (from elsewhere). Now that I recognize its full potential for extending our lifespans like with the chicken heart kept alive for 40 years in a medical research lab by a trick health tactic, now I will have to buy it again and logically use it for the rest of my life as I now rate its health potential that good for me, you, or anyone else who wants good health while living on this earth. Put \$25.00 into my Omni Law Loan Program shown on my website [www, fastboomamericaneconomy.co m](http://www.fastboomamericaneconomy.com) [miraclebread17@gmail.com](mailto:miraclebread17@gmail.com) Ask for "Lifespan Report" and we will send you report on my proposed "Stacking Plan" to potentially extend your lifespan by 40 years to maybe 100 years from what you face now for yourself and better health

for your body for these potential extra years of life. I tell you what health product to buy, how to take it daily, and you will be on my list if I do find a superior version of this natural health product and maybe at a lower price also. If you can't use the PayPal button, then send in payment made out to NIFI, say for Omni Law, send "lifespan report" and give us your name, address, and email. We use your email to send you report as soon as we get your order. Yours for God and Country, Erasmus of America (pen name for that Christian leader who is also heavy in natural health product research and experiments so I can give you super answers in natural health products and what they can do for you. We are not registered with FDA, so cannot say that medical sources have confirmed what we report to you based on the testimonials of others, but we invite your comments after testing our recommended natural health product for your use to shoot for a long lifespan based on the 40 year test with the chicken heart which we will explain how the doctor set it up so you follow his health logic to this long test which was totally successful! After you read this report, share it with your doctor and you can ask his opinion if fine for you to take natural health product based upon what natural health ingredient you do not get enough of in your food!

"There is no force so powerful as an idea whose time has come."

Senator Everett Dirksen of Illinois

P.S. Feel free to share this report with others. Shows why Omni Law needs to be passed in America! It is based upon the ancient Roman civil tribune concept of Roman law where they ran national referendums to protect the Roman citizens from tyranny in law which lasted for a long time of success as James Madison, "Father of the U. S. Constitution and U.S. Bill of Rights" admitted it worked great as a way to protect the legal rights of citizens from legal tyranny. But he commented that American leaders would be elected to office possessing legal ethics so this Roman civil tribune concept of law would never be needed in America. He missed the mark there and called this turn of history wrong! The corrupt won in America as no American version of Roman civil tribunes there to protect the people

from tyranny in the executive, judicial, and legislative branches of government. Like the ancient Jews, the Romans respected enormously what was practical and smart so nearly conquered the world for the Roman system of law after other nations made the mistake of picking a war with them and the Romans won instead of the other side so the Roman Empire grew as most powerful in the world for a long period of time. Roman culture built character in the people and so Roman Christians were stronger Christians than the Jewish culture which has grown too soft then to build strong character in the Jews at that time. The corrupt had to finally overthrow the Roman civil tribune concept of law before they could establish corruption and tyranny in the Republic of Rome which later led to absolute rulers over government instead of rule for, by, and of the people of Rome and under an ancient constitution of Rome which had to be overthrown as it was by non-admitted conspiracy of the corrupt in Rome. Sound like America today?
