## South Carolina State Parks

at 19:25:42 on 12/21/2010 UTC · 🌐

So, sounds like a lot of you were planning to stay up and watch the lunar eclipse? Who saw it? How was it? Was anyone in a state park when they viewed it? Tell us!

**Juli Wymer** I was at Dreher Island State Park but it was too cloudy. :(

**Kandy Balyeat Harrell** I got up to see it. It was clear skies here in Summerville and the eclipse was really cool!

**Ginger Goforth** I stayed up, but could see nothing through the cloud cover. Sad.

**Clyde S. Gorsuch** We watched from our back deck at home in Clemson from ~1:30 to 2:40. There were thin clouds most of the time with some good breaks. This lasted until almost totality and then the clouds blotted it out. It was great while it lasted.

**Patti Wygant** It was wonderful when the clouds would clear , through the telescope it looked like a picture in a book, stayed up untill 3am. Definately worth it.

**Hilda Flamholtz** I live near Irmo and I got up at 3:40 for a look. I could see it, but the red wasn't as pronounced as I expected. I thought it was more interesting when it starting moving out of eclipse. That was cool.

**Lydia L. Padgett** I watched it from Harbor Island, SC...right next to Hunting Island State Park...the light house on Hunting Island was beautiful under the reflection of that full moon and the eclipse that followed...it was BEAUTIFUL!
