## **RESERVE THIS DATE – October 23<sup>rd</sup>**

PANDORA'S PROMISE asks whether the one technology we fear most could save our planet from a climate catastrophe, while providing the energy needed to lift billions of people in the developing world out of poverty. In his provocative new film, Robert Stone tells the intensely personal stories of environmentalists and energy experts who have undergone a radical conversion from being fiercely anti to strongly pro-nuclear energy, risking their careers and reputations in the process.

When: Wednesday, Oct 23, 2013

Where: USC Aiken, Etherredge Center

Sponsored: by AREVA and CNTA
