## A **CALL-OUT** for *Constitutional Governors*

June 25, 2014 a monthly message from the IAP

# Legal immigration is the law, isn't it?

It was Benjamin Franklin who coined the phrase, "Rebellion to tyrants is obedience to God." This phrase inspired Thomas Jefferson, who made the (slightly modified) quote, "When injustice becomes law, rebellion becomes duty."

Yet, in the case of immigration, we have the reverse of this. The motto the federal government seems to prescribe to is, "When justice becomes law, rebellion becomes duty."

In the United States our just and correct "original" system of immigration has given way to political correctness on the pretense of compassion. We're not talking about the exception, where a few immigrants slip through the cracks. Illegal immigration has become a tidal wave of undocumented non-U.S. citizens entering our land for the purpose of being the recipients of socialism in the form of medical care, housing, food subsidies, and schooling.

Allowing this influx of theft to America's prosperity has set in motion a process in which the plundered classes, rather than seeking to abolish the perversion of newly proposed Amnesty and Immigration laws, are instead striving to get in on it.

Last month Sheriff Arpaio in Maricopa County, AZ made the statement that, "The White House is incompetent and the dumping of illegals is intentional." See <http://goo.gl/83Zxrn>. The Independent American Party couldn't agree more. Arpaio, with parents who came into this country legally through a deliberately hard process, has worked extensively on both sides of the southern border and doubts that most politicians have a clue of the conditions in Mexico or the southern United States. He cites extensive drug and gang related mayhem. "When criminals are deported," he says, "it doesn't seem to take long before they reappear in the United States — sometimes 10 or 15 times."

Arpaio has written to the new secretary of Homeland Security Jeh Johnson about the problem of repeat offenders but has yet to receive a satisfactory response.

As governor, please demand that the borders of your state be secure and that enforcement of immigration laws are a high priority, to help secure the rights of state citizens to life, liberty and property. Please stand firm and not ignore issues of non-U.S. citizens' perpetual breaking of the law by residing illegally and contributing to legalized plunder, let alone violent crime.

The citizens you serve have confidence in you, as does the Independent American Party.
