Today we testified before Congress because the federal government plans to shut down Guantanamo Bay and is looking at Charleston as a place to relocate the terrorists jailed there. They made this decision on their own without any communication. That's just wrong and it puts a unnecessary target on our state. No one, in any state, should have to live in fear that terrorists will be housed in their family's backyard. Please share and watch the full testimony here: <http://goo.gl/A59cLu>
