RE: REQ#833082   ORG#23617

In the mid 1960s, the state maintained portion of Scurry Island Road was poorly paved. Nothing was done to improve the road until the 1990s when pulpwood trucks tore up the road. State workers came and paved ½ of the one mile road, and nothing has been done since then. The ½ mile stretch left unrepaired is in extremely poor condition resulting in gradual vehicle damage, and needs a good repaving job. Close to 100 families own property in this Lake Greenwood lakeside community and Scurry Island Road is the only access to these properties. Lake property owners pay more taxes. Most of the property owners in this community do not have school age children who attend school in Newberry County and surely deserve at least a decent access road from the state and county.

Thank you for the opportunity to express this opinion on behalf of the residents here.
