Make no mistake: If we don't invest in smart infrastructure, **we will be left behind**. You wouldn't believe the **difference a laptop can make** for a foster teen. Ready or not, connected cars are coming; here's **how to get ready**. And don't forget, Smart Cities Week is next week!

Now you're caught up,
Jesse

Last chance: Smart Cities Week is next week. Don't miss out on Smart Cities Week, September 27-29 in Washington, D.C. It's North America's premier smart cities event, a great opportunity to network with your peers, and full of real-world success stories with lessons you can put to work in your city. Register now.

How smart infrastructure unlocks equity and prosperity in our cities and towns. As the U.S. election season focuses attention on national priorities, the Smart Cities Council has released a policy brief detailing how smart infrastructure investments in our cities and towns will create jobs and promote greater prosperity for all. Click now to read the executive summary or download the full report.

What a difference a laptop can make in a foster teen's life. With an estimated 80% of foster children without computers of their own, a California nonprofit took up the cause and has now distributed thousands of laptops to teens in the foster care system across the U.S. The results are stunning.

How one school district solved a critical problem (and saved money too). After a long statewide budget impasse, several Pennsylvania school districts faced possible school closures. But one district, plagued with HVAC system failures and maintenance problems, decided to invest in a \$3.4 million system upgrade despite the financial uncertainty. Read the story to learn why.

Why cities and automakers really need to talk to each other. Connected cars are coming — and fast. Read about new IDC research that shows how quickly they are coming and why the future of smart transportation requires collaboration between cities and automakers.
