**Subject:** Get the analysis of what's included in the Continuing Resolution

Dear friend,

Now that Congress has passed a 10-week continuing resolution, narrowly averting a government shutdown on Friday, it's time to get the analysis of what's in there.

That includes:

- \$500 million in flood relief for Louisiana and other states
- \$1.1 billion in emergency spending to combat the Zika virus
- Temporary funding to address the opioids epidemic
- Full-year fiscal 2017 appropriations for military construction and veterans programs

And much more ...

The provisions for Flint, Michigan, the last sticking point that held up the resolution, will be addressed through a water resources authorization bill later this year.

[CQ](#) knows you don't have time to read the whole continuing resolution. That's why our policy experts at House Action Reports will distill it (and ALL bills that are coming up for a vote) into a detailed summary and analysis. They'll break down the most important features to save you time without missing anything important.

[Activate your free trial to CQ](#) and start reading House Action Reports today.

Sincerely,

David Stevens
