Get excited! Our Department of Employment and Workforce has cut the Unemployment Insurance tax rate for the third year in a row. This is a direct result of our strong economy, more South Carolinians working than ever before, and our unemployment rate hitting a 15 year low. Most importantly it means we won't have to borrow from the federal government, the cost of doing business is down in South Carolina, so businesses can grow and we can take care of more families! #SCPride
