Message:

I was so happy when S.C. voted you in because I was sure you had the convictions and strength to stand for what's right. Look at the effects of your rhetoric concerning the reasons you and your legislature took down a South Carolina historical flag that stood for a fight against over taxation and oppression of the northern states. Our forefather's gave their lives for that fight, even our black forefathers. Now, because you swallowed the lies of the NAACP and other black groups that hollered Racist! You have caused a avalanche of blacks shooting blacks, destroying and defacing monuments, trying to dig up graves and even so The Black man who was there at the lowering of the flag was killed, supposedly by the black panthers. You'll live with that decision and others will die for your decision. That flag didn't represent that punk who killed those precious people...But you said it represented hatred and division. You were wrong. The racist are coming out of the woodwork killing and destroying cause S.C. said by there vote and actions- its alright to take it down and store it away. The ones killing are blacks. The ones being hated are whites and blacks who honored the flag. Now, you tell me why you were so gunhoe to get rid of your heritage. Now we suffer for your wrongdoing. You could have left it alone. Instead of attacking a flag - you should have given justice by prosecuting the crime. God help us all and I hope another civil unrest or even war within our borders will not come to be, Concerned and disappointed in you!
