Subject: RE: I believe plate

Just a clarification - it's cloud version A

Kyle and Tisha are checking to see if BL is available as a prefix; whatever the prefix, we need to have the production samples show that prefix.

The executive team has selected version A, with all black lettering.

Johnny,

We need 3m to break out in detail what the cost per plate will be, including mail charges.

We need to know what the individual cost is comprised of.

Also, if 3M can proceed with producing the production samples for this plate, I'd appreciate it.
