

February 24, 2015

The Honorable Nikki R. Haley
Office of the Governor
1205 Pendleton Street
Columbia, South Carolina 29201

Dear Governor Haley,

As a long term SCDOT employee, I would like to commend you for your recent announcement and decision and courage to revamp and reorganize SCDOT. I cannot think of a state organization that truly needs more change and it is long overdue. It needs to start with the top down. Unlike, most men in headquarters, I think putting both Secretary Oakley and Christy Hall is moving SCDOT in the right direction. One of the best things that ever happened to SCDOT was both John Walsh and Clem Watson being removed from their positions. The kickbacks to Walsh and free trips to the Grove Park Inn, etc... from paying contractors as well as numerous other vendors was unethical and dishonest. The brazenness with which Clem Watson used our very own offices for his sexual escapades was both immoral and revolting to me as a god fearing man. However, some other changes that have been recently made are very detrimental to forward process and seek to undermine your future plan for SCDOT. If this were exposed to the media, it will be an embarrassment to your administration; much worse than the former Secretary's very public DUI and arrest.

Embedded in SCDOT is an uneducated, sexual predator, who sense of entitlement and because of who his father in law is has managed to gain employment with SCDOT in headquarters many years ago. Mr. Walter Reed and a Mr. Magwood were removed from Headquarters years ago due to their sexual harassment of woman, use of state computers and other devices to view porn, and their gambling habits. They should have been terminated and would have been had it not been for the family connection who landed him the high paying job without even a college education. It was covered up then and the cover up continues today. We were lucky in headquarters when they both got shipped off to the District and we were led to believe they would never come back. Not as good as firing them, but still good.

Now, Walter Reed had returned in a blaze of glory and in rare form to headquarters. His constant bragging of his sexual conquests, constant sexual harassment of the females, and bragging of his political connections and how invincible he is, is sickening. Not to mention the constant criticism, of you, your staff, your appointment of Secretary Oakley and Christy Hall, which were all good choices.

Walter Reed often times is heard bragging with his former DEA, Thad Brunson about how they are running SCDOT, not Janet Oakley or Christy Hall. He has been overheard talking about what bullshit Jim Feda's reverence for the memory of his (Mr. Feda's daughter) is, and he should just over it as the bitch is dead. He apparently hates all Christians as he calls David Cook a bible thumping fool for simply saying grace privately in silence before eating. He holds Jim Johanneman in utter contempt for his progressive,

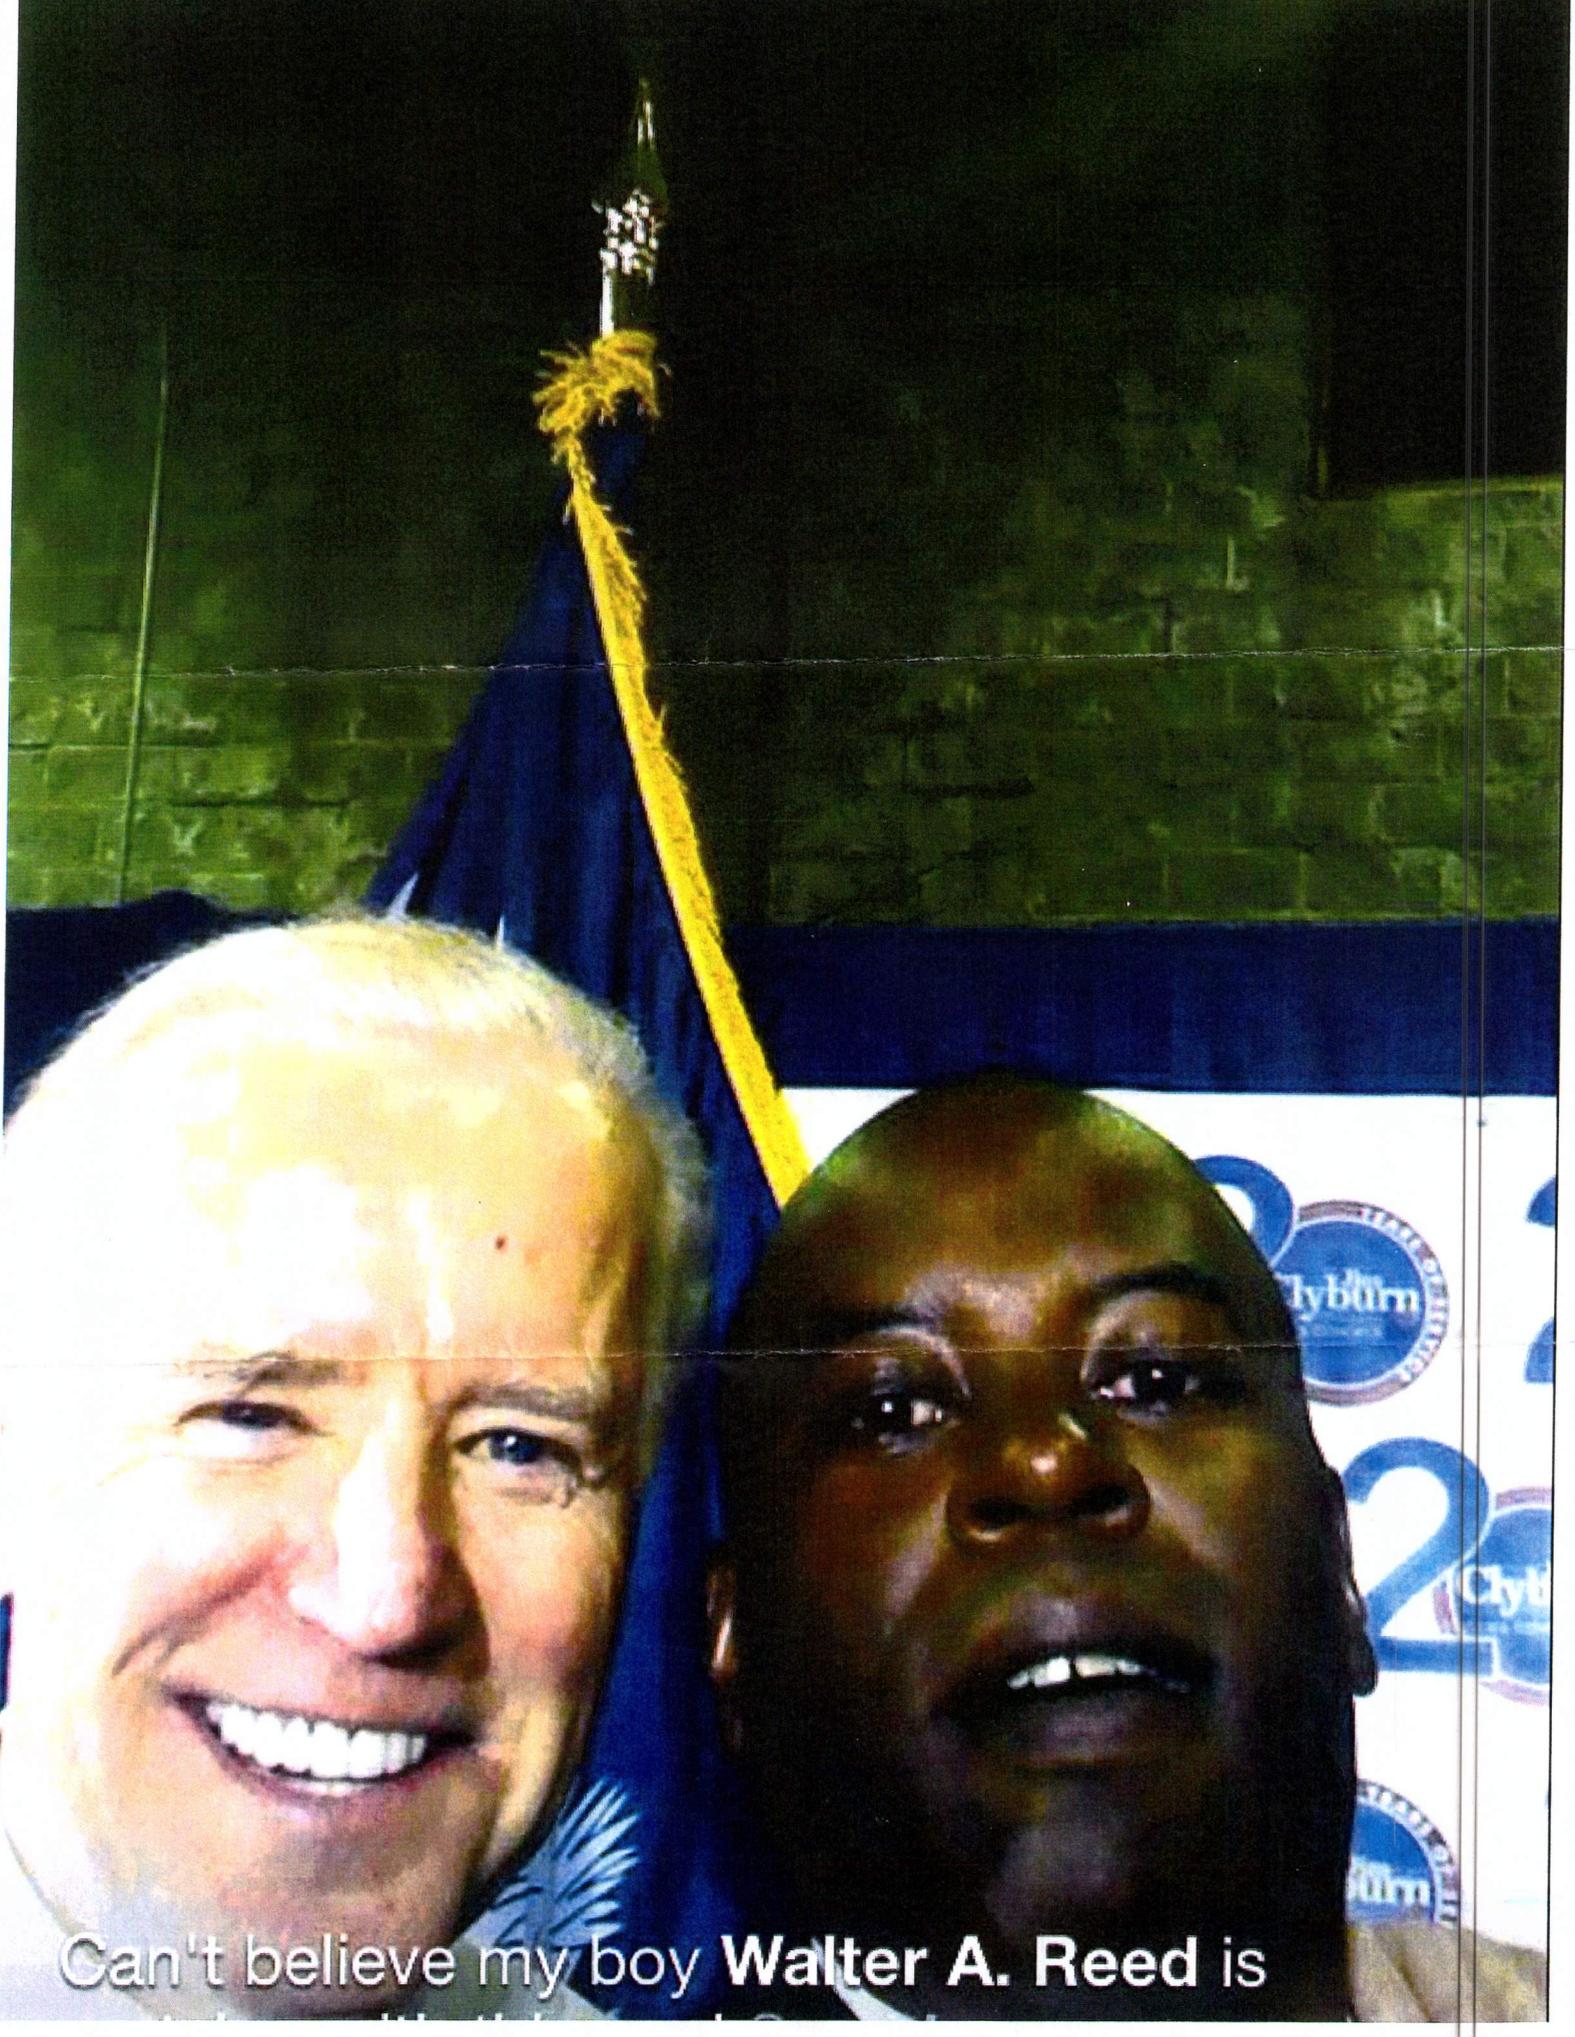

consolidation of the SCDOT sign shop. The president is trying to create jobs and Jim is trying to eliminate them by being more productive and kissing up to the Governor. Walter creates obstacles and criticizes any money saving ideas that anyone comes up with. It is all about making government bigger and control. I am going to now apologize for the vulgar words and expressions but I don't know how else to tell you what is being said. Walter can often be heard referring to Christy Hall as she eats pussy as good as he does and that is how she made it to the top. He has also said he would like to fuck her and you and stated that it would give the state a break from you fucking the State of South Carolina. He has also stated that he could straighten out Christy Hall if he could just fuck her one good time. He could cure her.

He is often overheard on the telephone talking to some female named Sherry who he apparently worked and slept with at the District office before he got promoted back to headquarters. There was apparently a group including a DEA, District Construction Engineer, a Resident Maintenance Engineer, and this Sherry, who slept with Walter and she slept with all of them. It is my understanding that they are all married which is biblically immoral. He has promised to get her a job at headquarters after everything dies down and time passes. He bragged he was promoted back to Headquarters as the District Construction Engineer was jealous of his sexual relationship with Sherry and the fact that some female Resident Maintenance Engineer had complained about being sexually harassed by Walter which complicated things further as she apparently wasn't just a routine administrative girl who had to have a job.

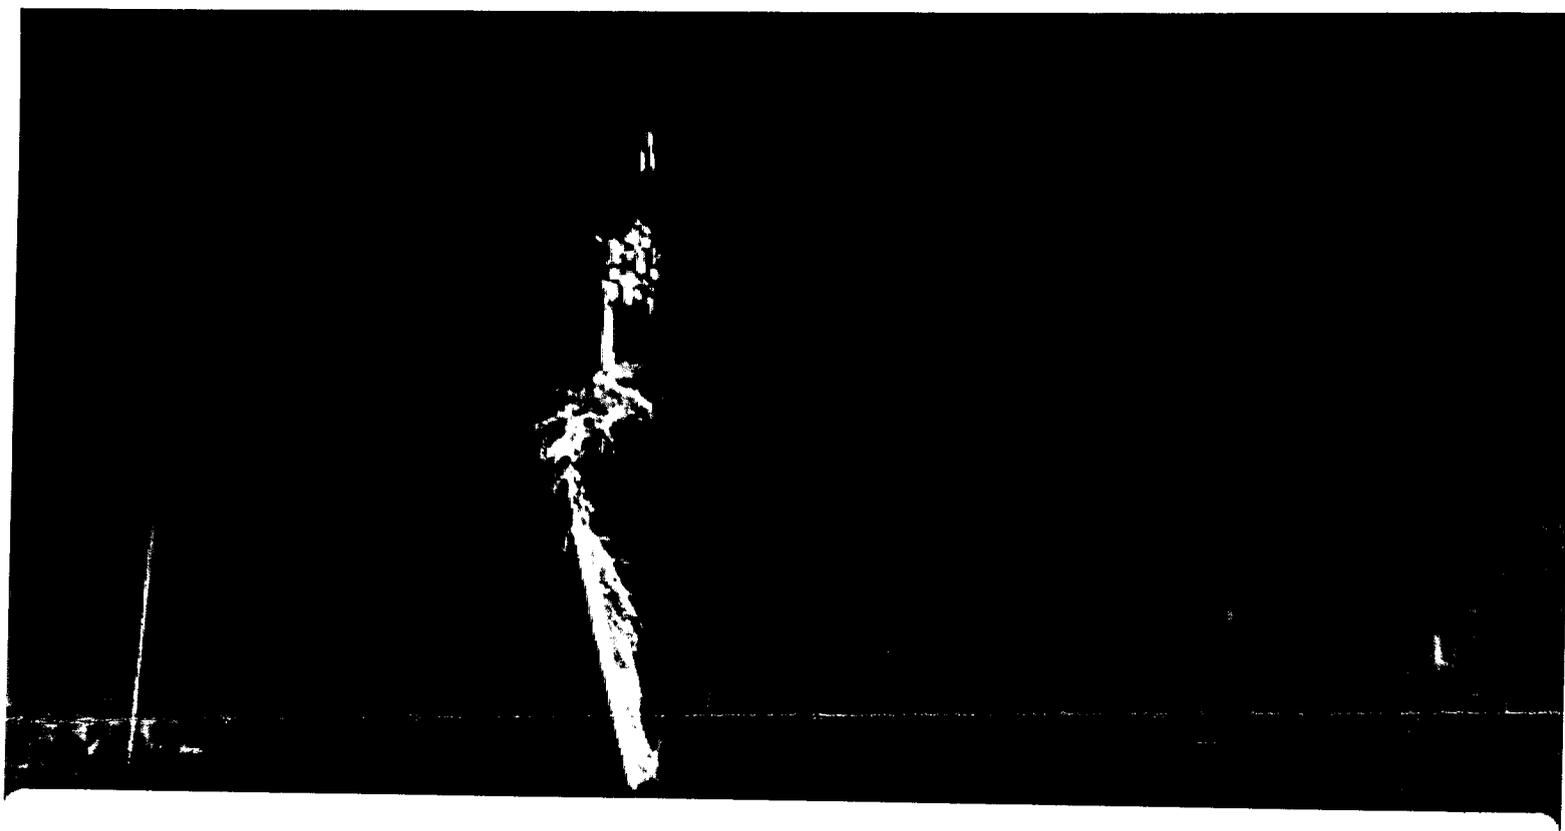

Walter routinely discusses SCDOT proprietary information both with Sherry and vendors as far as what the political ramifications and monetary gains might be profited from them. Some of this information would have to come from Chief Brunson as Walter would not have access to some of it. Madam Governor you should know that you have mole in your SCDOT organization who often leaks misinformation to the media and internet sites such as FITS news as it has been overheard by trusted, loyal, SCDOT employees who support your judgment and leadership.

I would like to disclose my name and sit down with you personally, however, I am only a few years from retirement and my wife is sick and I don't need to lose my full retirement benefits nor experience the retaliation that may occur when your administration leaves office.

I would hope you would have an external agency to investigate this as some will lie in an attempt to cover it all up but you will find some that will tell you the truth and will have the evidence to back it up. I hope to speak to one of your investigators soon. Enclosed is a photograph that Walter has brought to the office on numerous occasions to brag about that you may find interesting. Walter always makes the comment that he has the power and that he is untouchable. This abuse of power, and reward for incompetence, bad behavior, and disrespect for women should be stopped as it damages your creditability and that of SCDOT.

Can't believe my boy **Walter A. Reed** is
