Description/Significant Features:

Site 6284 is an active railroad spur line that leads from the General Electric Gas Turbine Plant located on Garlington Road west to where it connects to the CSX rail line. It consists of an approximately 2.7-mile segment of rail line. The railroad segment features a raised embankment covered with ballast that supports a modern track composed of wood cross ties and steel rails.

Alterations (include date(s), if known):

General maintenance
