Attachments: DriverMVR with Photo.pdf

---

FYI

This is the type of transaction that we could eventually put on the web for select users – like law enforcement.

**Subject:** Driver MVR with Photo

Attached you will find a driver record (MVR) that includes a photo of the subject. I was thinking that we would use this on the Member Services site instead of the simple Driver Inquiry transaction that I had developed earlier (and that we had demonstrated to SLED). The Member Services site would also include the traditional driver record transaction (like we are implementing on the Public Services site) for those users not authorized to obtain the photo.

Let me know what you think.

Wayne
