I have not heard anything about that and do not know of any input from our office. \$850 million specifically for dam repairs sounds like an astronomically high number.

Jay/ David- does this ring any bells?

Running this down for McClatchy.

It's our understanding that Trump put together a list of infrastructure needs with input from governors.

For South Carolina, the projects are \$850 million in accelerated repairs for dams damaged in the October 2015 flooding and assessed by the U.S. Army Corps of Engineers.

Can you confirm that the governor/governor's administration gave this input?

Best,

Jamie
