Toolkit_Preferences_Care_Lifestyle_PWD_Toolkit.docx

Dear ADSSP Grantees, System Integration Grantees, and Collaborative Partners,

We are pleased to provide you with two new resources. The resources include the *2014 Report on Closed Grants* and the *Preferences for Care and Lifestyle of People with Dementia: A Toolkit*. Descriptions of both resources are below and the documents are attached.

2014 Report on Completed Grants Final Report- Following an introductory and background section, this report provides an overview of sixty ADSSP projects that have ended, a description of the innovations and evidence-based interventions, a synthesis of program outcomes, a description of challenges faced by the projects, the ability of projects to continue after ADSSP funding ends, and conclusions about the 60 projects.

Preferences for Care and Lifestyle of People with Dementia: A Toolkit- Families and providers need tools to improve their ability to monitor the capacity of people with dementia to make decisions and express preferences to know when to step in and how far. This toolkit provides resources and selected research articles in the following topic areas: assessing a person's decision-making capacity and ability to participate, eliciting accurate input from persons with dementia and meaningful involvement in care planning, and participant direction.

Thank you,

ADSSP National Resource Center
