## Hurricane Matthew' Stark Reminder. . . It only takes one bad storm to make people wish they were better prepared.

Dear Nikki,

As clean-up from Hurricane Matthew continues, many agencies across the country – even in areas untouched by the storm -- are asking some critical questions.

If disaster strikes. . .

- How can we ensure citizens are able to access emergency services?
- How can we operate if our T1 goes down?

**Hughes Emergency Preparedness Solutions**, powered by our affordable SPACEWAY® 3 Satellite technology, can reduce the risk of 9-1-1 outages by adding network resiliency and true path diversity, should a terrestrial network path ever become disrupted.

And Hughes Emergency Preparedness Solutions offers:

- Emergency satellite broadband with nationwide coverage
- Support for redundant 9-1-1 call data centers
- Automatic failover switching if primary network line is disrupted
- On-board processing for direct point-to-point SATCOM
- Capacity-on-demand options for maximum cost-efficiency
- Multiple service classes to support voice, video and data

To discuss how your agency can get better prepared, call **1-844-817-5288** for a consult today, or [click here](#) to let us know how our experts can contact you!
