South Carolina State Parks

at 12:00:00 on 7/18/2017 UTC · 🌐

Gone Fishing! Just two weeks after fledging, this juvenile osprey is rewarded with a fresh catch! Fish account for about 99% of the osprey's diet, and a typical catch varies from 6-13 inches, and weighs up to about 2.5 pounds. What's your favorite fishing spot in state parks? (photo cred, Ranger Carl Berube)

Karen Rogers I went to a local State Park to get a park pass for disabled person. I have one for the US State Parks, but was told buy South Carolina State Park that I couldn't get one of yours. Also, who wants to pay the fee every year! I couldn't visit as many of the state parks in one year.

Mina Harrington I've seen many Ospreys fishing in Lake Murray on Dreher Island State Park. They are hysterical to watch when they are fishing -- the way they splash down into the water to get their fish.

Brian Benton Favorite fishing spot has to be Hunting Island. Wish the pier was repaired.

Patrick D. Husted Oconee state park is my favorite where I can fish for bass in the early morning on the lake and then go over to the Chattooga river to hike and fish for trout.
