Derham Holland Hope you post the full video, already learned something, in the iron seep comment. I always thought that was a sign of unhealthy stagnant water with brown bacterial growth. See you learn something new every hike.

Waking up the world. I'm no doctor but for years I have been in public places and witness , the same not sanitized areas. I know people will deny and laugh at me. For example I went to a school and restaurant for years, the same crud was on the wall. For this reason I don't go out to eat .When was the last time a public place was totally cleaned from floor to ceiling? Before we get back to normal, need to clean every facility in this world. Hire a million employees and pay them \$20 hour. No one in a Federal, County , town , etc. should get paid extra ... they are on a payroll while being at home. It's the little people that should be covered! Clean...clean...clean while people are at home. The most neglected places.
