Hi Christian,

In response to your question below, S. 261 increased revenue \$3,144,803 for FY 14, so if we lowered the 7% rate to 6.99209%, it would reduce individual income tax revenue by \$3,145,000 and effectively make the bill revenue neutral. The impact would affect different taxpayers as you noted. Please let us know if you have any questions.

Thank you,
Lisa

Great - thanks again. Hopefully, it's just an algebra problem and not too much of a headache.

Hi Christian,
I'll have Lise work on this; we'll get back in touch if we have any questions.
Thanks,

Frank

Subject: S 261

Frank,

Would you mind asking staff to determine what rate you'd lower the 7% bracket to if you wanted S. 261 to be revenue-neutral? I recognize that this action would affect a somewhat different group than those who will be adversely affected by S. 261 in its current form, and also that the answer is likely something like 6.996%...just wondering, in case we might want to get such an amendment offered. Thanks for your help.
