Hello Tony,

We invite you to attend the **10th Annual Risk Adjustment Forum**, taking place on **May 22-23rd in San Diego, CA**. This event is the premier industry event for health plans and engaged providers across the spectrum of Medicare Advantage, Medicaid, and Commercial plans. Every year more professionals attend to understand how risk adjustment, RADV, EDS transition, regulation, and the quest for quality strategies are evolving. You will hear directly from your peers about the topics impacting your financial stability, risk scores, and long term quality of care. Plus, learn from case studies that successfully engage providers and dramatically improve the results of data accuracy and documentation quality.

GET ANSWERS TO THESE IMPORTANT QUESTIONS

- What's the latest with the new administration and the repeal or replace status?
- How will the marketplace be restructured?
- What do the insiders have to say about RADV?
- How can you improve your accrual process?
- What do the IVA results reveal?
- What are likely changes/adaptions to IVA due to the results?
- Which data analytic approaches must be considered?
- What are the best practices for quality and risk adjustment?
- What are the results in the pilot states?
- Does the financial incentive make a big difference when it comes to quality?
- Will all the quality ratings disappear?
- Does working with doctors on coding trump analytic results?
- How do you continue to get the most out of your provider groups?
- What type of provider education is mandatory?
- What is happening in the regulatory world and where will that go?
- What can Medicaid learn from MA?
