From the offices of.....Gustavo A. Rodríguez

*Dear Governor,*

*Good Morning,*

*Just a few lines to wish you all good luck with the 2014 hurricane season.*

*I realize inaction justifies politicians's existence, the use of other people's money and Washington's bureaucracies.*

*But, the fact remains,*

*Technologies exist to possibly downgrade hurricanes, 100%, tornadoes, @ 80%, benefiting yourself, your state, your constituents, your party, contributors, special interests and our nation.*

*These technologies are even....MADE IN USA.*

*I am not a politician, nor do I have political ambitions, nor a desire to be on CNN or any other news, nor a cronie, a cohort, a weather expert, a pundit, a religious guru or a celebrity, I am just a citizen with a background in the natural sciences who understands weather issues and who has identified two technologies to benefit millions.*

*You can ignore me, but, next time a hurricane or a tornado hits your state, and, while waiting for FEMA to show-up, other dedicated public officials to tour the disaster area and tell everyone on CNN.....*

*" WE ARE DOING EVERYTHING POSSIBLE TO HELP YOU REBUILD YOUR LIFE ".....*

*REMEMBER.....IT MAY HAVE BEEN PREVENTED.*

*The Supreme Court recently approved removing the limits on campaign contributions by anyone, thus, clearing the way for large contributors and special interests to finance political campaigns, this in preparation for an expected drop in donations from voters as politicians have shown their true color.*

*Just like both, republicans and democrats pushed for and got the above, quietly, a true bipartisan effort!!!, the same can be done with PROJECT SAFA, it would benefit both.*

*PROJECT SAFA will not require an act of God, the resources are available, all it takes is to re-direct these to benefit millions.*

*Unfortunately, the Supreme Court decision benefits only one, the politician.*

*Politicians' future success belongs to those who can raise more money to buy congressional votes and alter voting rights, the popular vote will be going out like the horse and buggy and typewriters.*

Monday, May 5, 2014 AOL: Gtavo

*Hurricanes and tornadoes are natural events which affect our nation and thus the responsibility of the White House.*

*Our government spends money repairing damages which are preventable.*

*NOAA can tell us where and when these natural events will occur, it seems to me this agency should be the one to take the next step, and stop them.*

*PROJECT SAFA will provide the expertise to downgrade hurricanes to tropical storms, and prevent tornado formation, and, destroy them if formed, create a new industry, contribute to reduce the federal deficit and improve politicians' image, all with.....*

*US MADE TECHNOLOGIES.*

*The thought may cross your mind that PROJECT SAFA would not be in the best interest of politicians, in addition to the above reasons, because, if it were to be implemented, and, voters learned that those politicians were aware of these technologies and did nothing, their political careers would be over, this' just another justification for doing nothing, as, politicians support industries which kill thousands every year, s/a, tobacco and guns, and hurt millions...ON PURPOSE, by financing "rocket docket judges", yet, these continue to run for re-election and people keep voting for these!!!, go figure???*

*It is well known that politicians prosper during chaos and instability.*

*PROJECT SAFA would generate a profitability of @ \$ 10.0 billion dollars, I am not interested in any of this money, 100% could be dedicated to benefit our nation.*

*Interested?, let's talk.*

*Sincerely,*

*Gustavo A. Rodriguez, (Gus)*

*Ph. & Fax. (954) 741-1410 Cell. (954) 993-8277*

*History repeats itself,*

*NASA, an engineer recommended not to launch the Space Shuttle Challenger on account of the ambient temperature being too low and the seals may not hold, this could cause an explosion, management ignored him, the result was Challenger exploded seconds after launch, seven astronauts died.*

*BP, an engineer complaint about cutting corners, even called the drilling " a well from hell ", as this could cause an explosion, management ignored him, the result was a few days later Deep Water Horizon exploded, eleven workers died, causing the largest environmental disaster in US history and a serious financial problem for BP and the US economy.*

*The Bush and Obama administrations as well as the governors of affected states ignored PROEJCT SAFA, the result has been.....KATRINA, RITA, WILMA, GUSTAV, IKE, IRENE, ISAAC, SANDY and many of the tornadoes that have killed many, @ 2,400+, hundreds of thousands of properties destroyed, billions in losses.*

*Tornadoes have destroyed or seriously damaged the following cites/towns...Greensburg & Pleasanton, KS., Joplin, Branson & St. Louis, MO., Henryville & Marysville, IN., Harrisburg, ILL., West Liberty, KY., Ooltewah & Smithville, TN., Moscow, OH., Dexter, MI., Moore & Ok. City, OK. Mayflower & Vilonia, ARK., Tupelo & Louisville, MS., and many others.*

*The US government spends billions to repair damages that are preventable.*
