It's out there. Columns G/H in Awesome now show the agencies' recurring requests as a delta, instead of the total ask for FY 2014-15. Makes it easier to compare the ask to the budget. I also cleaned up the descriptions of a number of the recurring decision packages...now that we have extracts, we can see what the funding source was that the agencies wanted for each package. Some that were marked up like they were GF are now clearly ID'd as OF.
