---

I can explain in the morning, but a few bulletpoints so I don't forget:

1. Higher Ed Tuition Grants Commission and PEBA are missing...others may be, too...I didn't do a full check, but I noticed those.
2. I fixed a bunch of the agency codes for the legislative agencies...didn't look to see if others had errors. As soon as I changed those, though, the FY 2013-14 Act cells populated, so I took that as a good sign.
3. I hid one column that I don't think needs to appear here. It now fits full-width at 100% on whatever size monitor I have here.
4. I see that Ports and USC Provisos are in now, but comparables aren't in...like A99, for instance. Not sure how I feel about having those in or out, but we should probably treat them all the same.
5. I think I'd like to keep our dummy decision package numbers shorter, to help keep the cells from getting too big. Maybe just do G001, G002, etc.?
6. I can explain what I'm thinking with the decision packages...those cells where we had all the summary and explanation got too big last year...to the point where you couldn't print them and get all the text sometimes (or see it all on the screen). It would be even worse this year if we tried to keep track of the package numbers in there, too.

OK, that's enough fun for one night...
