Dear Colleague,

Domestic violence takes many forms—physical abuse, psychological and emotional abuse, and financial abuse. Financial dependence is one of the strongest forces compelling victims to stay in abusive relationships, and abusers manipulate money and property just as they do threats of physical violence when coercing partners. The current issue of *Domestic Violence Report* focuses on identifying and combating economic abuse, and taking advantage of legal remedies available to victims of property and financial exploitation in the context of intimate partner violence.
