Subject: Parking garage

Tony – I entered the garage around 7:45. He was parked on 2A, closing his car door and began walking towards the center stairs and looked as I passed him. I circled up 2B,3A and as I passed the glass doors on 3B, which is where I expected to see him entering the building on the right to go to work, he was almost at the top of the ramp on the left across from the glass doors putting him up on 4A (which he has done before and watches me drive past). I don't make eye contact with him, but this morning he saw me look up the ramp at him and he turned around and headed back down it. Since I park on 4B I did not feel comfortable, instead of going up to 4B I took the down ramp and exited the garage – drove around town, came back close to 8. Again, I don't know what he is doing, but it is making me very uncomfortable.

He has been parking in space 224 Reserved on 2A – however this has not always been his space.

If building security wants to talk to me, I am ok with that.
I would just like to know who he is and if he is dangerous because I am ready to confront him.

Thanks....
