

**Psychiatry and Big Pharma** are responsible for all the shootings over the past several years. With the only exceptions being actually terrorism related, every one of those shooters were on or had recently been on dangerous, mind-altering psychotropic drugs, all the way back to the boys from Columbine, CO! Troubled people don't go out and shoot others, but those drugs turn a troubled person into a suicidal psychotic. Does anyone see that elephant in the room? Oh no! It's "Take away the guns!"

Psychiatry has also misdiagnosed and is currently drugging about 10 million kids in this country and millions more worldwide on Ritalin, which is in the same classification as cocaine and just as addictive. They are creating a generation of drug addicts! People in some states have been forced to allow their kids to be drugged. They want to "screen" teens and allow school nurses and teachers to give out the drugs. Their latest plan is to "screen" babies for "mental disorders" and put them on drugs from day one! And people wonder why our educational system in this country has deteriorated?! It began deteriorating the day it and our children got in the clutches of psychiatry!

Psychiatrists will admit they don't actually know what mental illness is, nor have they cured even one person and yet they are touted as our mental health "experts"?! There is NO scientific or medical basis for any of their so-called "mental disorders". They are simply made up and voted in at their annual meetings and then added to their "Diagnostic and Statistical Manual of Mental Disorders"!

All of this and more has been documented by CCHR (Citizens Commission on Human Rights). They try to get the word out about all of this and psychiatry's evil Nazi history with a traveling exhibit called "The Industry of Death" and they have worked very hard to get the black box warnings on these dangerous drugs. Go to [cchr.org](http://cchr.org) for more of the truth.

Psychiatry and Big Pharma have big lobbies and exert undue influence on our congress and government officials while continuing to rake in billion\$ and destroying lives. Our bought and paid for FDA which is supposed to be protecting us, works instead to protect Big Pharma's profits by blithely continuing to approve these dangerous drugs while trying to get rid of vitamins and health stores. I'd like to see a statistical comparison between those who have died from an overdose of vitamins versus those who have died from an overdose of drugs!

Mr. President, there are still many good things about this country, but the number has dwindled over the past years. For most of my life I've always been proud to be an American, but now as a senior, I don't feel quite as proud as I used to. While there are many good and honest ones, quite a number of our elected politicians are either afraid to speak the truth or too worried about their own little "empires", their own pocketbooks, getting re-elected or being politically correct, to stand up for it. As a result, they (and this includes the White House) have lost a good deal of my trust and I don't think I'm the only citizen who feels this way.

Yours truly,

Marcia Winborne-Graven

Subject(s): Prisoner rehabilitation; Illegal Aliens; Psychiatry and Big Pharma

Dear Mr. President.

I hope this letter reaches you, but if not, I hope whoever does get it will route it to someone who is open to the truth.

**RE: Prisoner Rehabilitation:** I think that the Governor of Arizona has the right idea and many other state governors probably agree with him. Prisoners should quit being coddled and put to work instead. Not only would working every day be beneficial to the tax payers, but it would also be of great benefit to the prisoners, both physically and mentally. I don't include extremely violent or murdering criminals in this and I'm not talking about "chain gangs" but doing work on public projects and other things that need to be done. For most law breakers, being productive and feeling like one is making up for one's bad deeds will do more to rehabilitate them than anything else. Also, many hard working tax payers can't afford the level of medical care and other benefits given to prisoners. The rights of prisoners have become more important than the rights of tax payers! Eliminating those excess "comforts" would save money and might help to make prison an actual deterrent to crime.

**RE: Illegal Aliens:** I have nothing against real immigrants. Legal immigrants like my grandparents helped build this country and make it great. They learned English and became citizens as fast as they were able and worked very hard to contribute.

The people who sneak across our borders are not "immigrants" and taxpayers shouldn't have to pay for the education, medical care and welfare of illegal aliens who are citizens of another country! I don't include children who came here not of their own accord and who are a minority, but the majority who are breaking our laws and sneaking across our OPEN BORDERS. This wouldn't be happening if our laws were being enforced and our borders sealed. Your policies say to them "Come on in – we'll take care of you!" and Mexico encourages it so they have fewer to take care of. Of course you and our so-called representatives are not included in that "we'll". It's us taxpayers who have to foot the bill. And, WHAT'S TO KEEP TERRORISTS FROM SNEAKING ACROSS OUR SOUTHERN BORDERS DISGUISED AS MEXICANS? The government used to protect its citizens but is not doing so now. It seems to be more concerned for the welfare of the illegal aliens.
