Subject: Portal Review Committee:

Portal Review Committee:

This is in reference to completing our RFP evaluation process for the South Carolina State Portal. As you know, NIC was the highest scoring vendor of eleven respondents to the RFP. Recently, NIC responded to our request for additional information regarding the e-commerce transaction engine and NIC's ability to meet their stated commitments for portal redevelopment without the use of DMV records. This information was forwarded to you for comment.

Based on the response received from Mike Garon and subsequent conversations, it is our understanding that DMV, DOR, and LLR are working together to provide both ACH and credit card processing capabilities. It is also our understanding that some technical modifications are needed to ensure compatibility between systems. LLR is working to provide the necessary interfaces and modifications.

We are at the point of continuing negotiations with NIC for the portal refresh portion of the RFP. As we initiate these negotiations, we are operating under the assumption that all e-commerce transactions will be handled through the DOR/DMV systems and that NIC will be provided with the "hooks" into the system for any applications they deploy. Please confirm your agreement with the above by responding to this email as soon as possible. We are planning a briefing with the leadership of the Budget and Control Board and their staffs where we will discuss the status and next steps for this project.

As always, thanks for your participation in this project.

Please let me know if you have any questions or need additional information.
