**Selah Linder** I remember snacking on these as a kid. They are fun to eat. I harvest them by torching the prickles off the fruit first and pick them by hand. I don't remember ever using tongs, but that's a good idea. I do the same with the leaf pads. They are edible as well. They call them nopales in the Southwest. I like to pickle them with onion and jalepeno (nopalitos). My favorite way to eat them is as a pizza topping or in refried beans. These days I buy nopalitos in a jar since I don't have any prickly pear in my yard.

**Patti Masencup Gibson** I didn't realize they were native. They're a bit of trouble to harvest ( both pads and fruit ) but worth it.
