Subject: A Truthful Understanding of American History

I would like to invite you to take advantage of an offering by 16 independent US Historians in their factual presentation of American history with respect to The War Between the States. The reason to bring up something that is 150 years old is because the problems that arose from that conflict are very relevant to the problems we face yet today and are still very much with us. Things such as abusive federal power wholly-consolidated in Washington DC, very poor current race relations, a country more divided than ever in 2017, and the continued trampling of the US Constitution, are only a few problems that we can improve on by truly understanding what really happened up to, during, and immediately after that time period.

This accurate historical publication is 100% FREE to all Americans and is less than 100 pages in length. The enclosed cards contain more information, or visit www.southernhistorians.org. There is no cost or obligation to anyone. This publication is simply an honest attempt to educate the American people, indeed all people, about what really happened that changed our republic of limited government into the monstrosity that it is today.

It is impossible for a people to truly navigate their own future and know where they are going, without them having a *truthful* understanding of their past. As Americans, we have been presented a *less-than-truthful* account of our past for 150 years. If we try to convince someone that spaceflight is some sort of magical creation rather than a simple understanding of aerodynamics and physics, it wouldn't be any more a misrepresentation than what we've been taught about the conflict of 1861-1865.

Please take advantage of this offer at your convenience. All in the name of enduring, God-given liberty on this continent, I humbly encourage it. Thank you for your time.

Sincerely,

James Isaac Kelly
