Subject: FW: breach questions

Chaney,

See below for questions from Tim. I will send the other talking points we discussed in just a bit. Just want to confirm with our CISO that what I have are the latest and greatest. More soon.

Thanks,
Ashley

Subject: RE: breach questions

Bonnie,

Basically, and to whatever extend you can detail, I would like to know the differences in cybersecurity at DOR now compared to before the breach.

Have there been any breaches since then ? And does the agency feel confident now that a breach like the one four years ago could not occur at again at DOR?

If you could get me responses by Thursday noon, that would be super. If you want to send me comments by the director, that would be fine, or if he is available by phone in the next couple days that also would work.

Thanks!

Tim
