Subject: vaccines given by pharmacists ~ Website email from Carrie Porter

---

I would like for you to know that retail pharmacies are setting weekly quotas for flu shots and non-flu shots. Pharmacists are getting written up for not meeting quota. This is pushing us into a sales position and it is putting our jobs at risk. I do not believe shot quotas was the intent of the law. The intent of the law is to improve access for patients. Can something be done about this? Can the law be modified to prevent quotas? We should not be getting written up over this. Pharmacist are also hosting flu shot clinics on their days off in order to meet quota. I do not see nurses having to do this. Thank you.
