Tuesday Tidbit! CANNONBALL!!!!

**Sue Ann Tarkenton** I felt so badly for them all washed up on the beach. I picked a few up to throw them back in but they were all dead. . . :0 (

at 20:03:03 on 7/05/2011 UTC

**Cindy Stockman** There were lots of them every morning on Folly last week.

at 20:08:01 on 7/05/2011 UTC

**Amy E Ballard** Good to know. We saw several washed up on Huntington and even saw some in the ocean. I assumed they would sting.

at 20:32:18 on 7/05/2011 UTC

**Karen Elks** Folly is the only beach i have ever seen them on ! and yet i have never seen a starfish there that i heard wash up every year.

at 23:30:24 on 7/05/2011 UTC

**Robert Barron** Don't worry about a Jellyfish shortage. Smithsonian magazine predicts they will rule the oceans. They reproduce sexually and asexually. As ocean temp rises, they toss off more and more pollops that grow into j-fish. Other species are declining from over-fishing and warming oceans. J fish say I'll call you and raise u a hundred million of us more.

at 0:47:39 on 7/11/2011 UTC

**Robert Barron** That's their prediction anyway from testing how they respond to higher temps in the lab.
