Dear Governor -

I am so so sorry to hear about everything you are dealing with in South Carolina. It is just awful. I do think to say that there isn't space to be discussing gun control though is not honoring the 9 victims especially knowing that the Senator was in favor of gun control. They would be wanting us to have this conversation since they can't any longer. The country is frustrated and are not aligned with the solutions the NRA is producing. People are getting frustrated with the avoidance that seems to be a common political stance after these massacres. It will happen and I would encourage you to be a leader.

Kristen.
