Message:

The Confederate Battle Flag has no place on public property in the United States. It represents hatred, bigotry and racism, and now, more than ever, it represents death to nonwhites. It is equal to the Swastika. You, of all people, with your rich tradition and with your non-white heritage, should take action to remove the flag. Your job should be much bigger than talking to CEOs, 98% of whom are white males. Your job should be much bigger than the taxpayers' bottom line. Your job should also be to set a shining example. Your job should be to create your own profile in courage. Your job should include figuring out a way to clearly distance yourself from that flag and finding a way to get it taken down.
