Subject: State Incident Communications Conference Line (SICCL)
Attachments: [SICCL 23 June_2015.xls](#)

Colleagues,

Please find the latest version of the SICCL list. (Updates are highlighted in yellow)

"The SICCL (similar to the National Incident Communications Conference Line - NICCL) is a dedicated Federal-State incident communications conference line. This standing communications resource can facilitate and ensure the inclusion, transmission, and exchange of incident management information, evacuee coordination, and messaging relating to all States and territories. Access and use of this line will be managed by DHS Public Affairs. Examples of information could include unclassified public affairs guidance supporting threat information, pending national decisions, and major incidents where updates are beneficial in support of State-Federal external affairs situational awareness."(Emergency Support Function 15 SOP)

There are two tabs at the bottom: one for state and territory communicators, the other for city communicators. We need your assistance by checking and updating the list.

State Level: Governor Press Staff, Homeland Security/Department of Public Safety/Emergency Management, State Police PIO etc.

City Level: Mayor Press Officer, City Manager Director of Communications, Police Dept PIO, Fire Dept PIO etc.

We hope this roster continues to be a resource for you. If you have any questions or comments feel free to contact me.
